Illinois Medical Malpractice and Personal Injury Attorneys

6-1-2010

Medical malpractice is when a doctor or other medical professional injures a patient due to negligence. When you seek medical care, there is an expectation that you will be treated according to established standards of practice. When your care deviates from these standards and results in injury, you can sue for medical malpractice. Medical malpractice can be either a **personal injury** or **wrongful death** case. These cases can be both challenging and costly to prove. It's important to choose a law firm with knowledge, experience and resources to advocate on your behalf. At **Ankin Law Offices**, that is what we offer our clients.

Types of Medical Malpractice Cases

There is great variety in the types of medical malpractice claims filed. The most common types include:

- *Birth Injuries
- *Emergency Room Malpractice
- *Gastric Bypass Surgery Malpractice
- *Cosmetic Surgery Malpractice
- *Hospital Malpractice
- *Surgical Errors
- *Diagnostic Errors
- *Anesthesia Errors
- *Medication Errors

*Adverse Reactions

*Unauthorized Treatment

*Sub-Standard Care

*Breaches of Doctor-Patient Confidentiality

*Medical Malpractice Lawsuits

Medicine is not an exact science and patients don't always get the outcome they want or expect. In some cases, medical treatment or surgery may not be able to cure an illness or correct an injury. An unexpected result alone is not grounds for a medical malpractice lawsuit. For a malpractice suit to be successful, plaintiffs must prove the negligence or intentional wrongdoing of a medical professional or hospital.

Consultation with an attorney who is knowledgeable about medical malpractice can help you determine if you have a case and how to best proceed.
