Written On October 22, 2009 By [Bob Kraft](#)

[DrugWatch.com](#) is a helpful site that consists of a database of medications, with information about conditions treated by the drug, interactions, suggested dosage, and possible side effects. Check it out. Here is the description from the site:

Welcome to DrugWatch.com

DrugWatch.com is a comprehensive Web site database featuring extensive information about thousands of different medications and drugs currently on the market or previously available worldwide.

DrugWatch.com includes up-to-date information about prescription and over-the-counter medications and includes details about associated side effects to aid in the protection of patients and consumers.

The resources available on DrugWatch.com are provided to offer visitors free and accurate information to aid in the understanding of various medications and conditions. The content on the site may help consumers formulate questions for medical professionals and alert the public about important information regarding potentially dangerous side effects associated with certain medications. By providing FDA alerts, drug interactions, and potential side effects on the site, patients have access to valuable knowledge that could enhance their ability to voice concerns with their doctor and improve their quality of care.

Comprehensive List of Drugs

Select a medication from DrugWatch.com's comprehensive database to learn about conditions treated by the drug, interactions, suggested dosage, possible side effects and more. The medications located on

FAX: (214) 637-2118
E-mail: info@kraftlaw.com

DrugWatch.com include over-the-counter drugs, prescription medications and additional products utilized for medicinal purposes, itemized by both brand and generic name.

The [A to Z list](#) of medications provided by DrugWatch.com can help visitors learn more about a drug a doctor may have prescribed and alert users to potential complications or side effects that a patient or family member may wish to understand. Recalls, discontinuations, black box warnings, and other medical alerts are provided for each medication to keep users updated with information from the FDA.

News and Breaking Developments

The [News and Alerts](#) section of DrugWatch.com is updated daily with the latest information concerning drug recalls, medication approvals, clinical trials, new treatment options, and other current developments in the medical field and pharmaceutical industry.

Side Effects

DrugWatch.com offers detailed explanations of the [side effects](#) associated with thousands of medications. A complete list of side effects is listed on the site, as well as the side effects associated only with certain medications. This resource enables patients to fully understand risks associated with the use of certain medications and may help formulate questions to ask doctors. By providing drug interactions, precautions, and side effects in a simple and organized manner, patients can identify potential problems and voice concerns to a doctor should symptoms appear while using a drug.
