NEWSBYTE: China Bans Bisphenol A in Infant Feeding Bottles

The Ministry of Health, together with five other China ministries, issued a joint notice on May 30, 2011 announcing that the production of infant feeding bottles made of polycarbonate or containing bisphenol A (BPA) is banned in China starting June 1, 2011. From September 1, 2011, the import into China or sale in the China market of polycarbonate infant feeding bottles or infant feeding bottles containing bisphenol A will also be prohibited. For other food contact materials and articles, the specific migration limit of bisphenol A must comply with the limit set in the related national safety standard.
