Get Widget

Do you write a blog or manage a website that caters to folks in the construction industry? If so, Zlien's new deadline calculator widget can offer your visitors a very powerful service.

From right within your website, a visitor can calculate the mechanic lien and preliminary notice deadlines that are applicable to their specific project. After the deadlines are calculated, the visitor can set an email reminder or add the deadline to their desktop calendar. All without every leaving your page!

This is not just a simple day-counter. The Widget utilizes Zlien's expansive database of lien deadlines and requirements. It learns about the project's state, the user's role in the project and the type of project to figure out exactly what lien and notice requirements apply, and when they are due.

The Widget works on federal projects and state projects for every state. It works in most states for state projects.

Adding the Zlien Widget to your website or blog is easy. Just click on this link, and get the code for your site:
