

Powerpoints

Deliver Powerful Presentations with Powerpoint

Powerpoint's custom styles and animation can help you create engaging presentations that:

- Capture your audience's attention
- Deliver your message with style and clarity
- Leave a lasting impression

Popular Powerpoint applications include:

- **New Business Pitches**
Communicate your firm's expertise and successes
- **Webinars/Seminars**
Display slides to attendees that successfully drive home the speaker's points as he or she walks through the presentation
- **Flash**
Powerpoints can be converted into Flash presentations and displayed on the Web. Make your entire Powerpoint portfolio available for viewing on your website!
- **Audio**
Convert your Powerpoint to Flash. Then add sound to create a synchronized podcast with both visual and audio elements.
- **Brochures**
Powerpoints can "double" as interactive brochures distributed electronically to prospects together with other marketing materials.

Visual Power

eLawMarketing designs visually compelling Powerpoints for use in client pitches, webinars, seminars, and as electronic brochures.

“The Powerpoint materials you created to present to prospective clients is exactly what we needed to convey our unique investigative due diligence services, and has proven itself in our business development efforts. The design has a strong visual impact, and the features and benefits of our products and services are presented in a logical, engaging, and cogent manner.”

– *Michael Rothman, Principal, Rothman Consulting*
