

Report #7

Dirty (Crooked) Doctors:

Doctors/clinics. There are crooked doctors and clinics that pay money to automobile accident victims to be their patient. You know that they have to recover this money somehow, don't you? They recoup the money with unnecessary testing or by billing for extra, phantom visits. The insurance companies monitor treatment bills carefully; they know who the dirty doctors are. Readers, we are talking about insurance fraud.

If you have a case with one of these medical mills, an insurance company will never give you a fair settlement offer. It will discount and disbelieve whatever the dirty doctors say is wrong with you. And that's if you're lucky and no one is arrested and the clinic is not closed down.

When the doctors get arrested and their clinics close, what happens to the patient that genuinely needs treatment? Or if that patient has a lawsuit, his records end up lost, or in the possession of criminal prosecutors, and are unavailable for that patient's accident case. I know of one case where a dishonest neurologist was sent to jail. His patient's case came up for trial and there was no physician available to testify. And the patient's case was severely damaged.

Walk away from dirty doctors and medical clinics that offer money. Deal with ethical, facilities that act within the law. That is good medicine, and good for your personal injury claim.

Please don't forget that there is no such thing as a free lunch. If you deal with crooked professionals, your case will be damaged. You will not get true justice, or fair money for your injuries.
