TABLE OF CONTENTS

TABLE OF AUTHORITIES iii

ISSUES TO BE DECIDED.....x

ARGUMENT3

I. THE STATE-SECRETS DOCTRINE MANDATES DISMISSAL OF ALL CLAIMS3

II. THE CALL CONTENT CLAIMS MUST BE DISMISSED (CLAIMS 3 AND 5).....7

 A. Title III Does Not Apply To National Security Intelligence..... 7

 B. The Complaint Fails to State a Claim for Interception or Surveillance.....9

 C. The FISA Claim Must Be Dismissed10

III. THE RECORDS CLAIM FAILS BECAUSE ECPA DOES NOT APPLY TO THE FACTS ALLEGED (CLAIM 2)11

 A. ECPA Does Not and Cannot Be Construed To Restrict the Collection of Intelligence for National Defense Purposes 11

 B. The AUMF Is Statutory Authority to Obtain Access to Call Record Information19

 C. The Emergency Exception Applies 20

 D. The State-Secrets Privilege Requires Dismissal Of The Records Claim 22

IV. IF ECPA’S RECORDS PROVISIONS WERE APPLICABLE, THE SECOND CLAIM NEVERTHELESS FAILS AS A MATTER OF LAW22

 A. Defendants’ Alleged Provision Of Call Records For Inclusion In A Database Does Not Constitute The “Divulgence” Of Records..... 23

 B. Plaintiffs’ Records Claim Under ECPA Must Be Dismissed Because It Seeks to Hold Defendants Liable For Activity Protected by the First Amendment..... 26

 1. Defendants’ Alleged Communications Are “Speech” Protected by the First Amendment..... 27

 2. Defendants Cannot Be Held Liable for Their Alleged Petitioning Activity..... 29

 3. Defendants Cannot Be Held Liable for Their Alleged Speech 32

 a. Strict Scrutiny Applies 32

 b. Prohibiting the Speech Alleged Fails Strict Scrutiny 35

 (1) No Compelling Interest Exists That Would Justify Prohibiting The Speech Alleged..... 35

26
27
28

- (2) Prohibiting The Speech Alleged Is Not The Least Restrictive Means 34
- c. Prohibiting Speech As Alleged In The Complaint Fails Intermediate Scrutiny 39
- d. The Complaint Must Be Dismissed Because It Seeks To Impose Liability On Protected Speech..... 41
- 4. Under *Ashwander*, ECPA Must Be Construed To Permit Defendants’ Alleged Speech and Petitioning Activity 42
- V. THE REMAINING CLAIMS MUST BE DISMISSED..... 46
 - A. Claim 4, Under 47 U.S.C. § 605, Must Be Dismissed 46
 - B. Claim 1, Under 18 U.S.C. § 2702(a)(1) and (a)(2), Must Be Dismissed 46
 - C. The State-Law Claims Must Be Dismissed..... 46
- VI. CLAIMS AGAINST MCI ARE BARRED BY THE BANKRUPTCY DISCHARGE 48
- CONCLUSION 50

ISSUES TO BE DECIDED

1. Does the state-secrets privilege bar litigation of the claims alleged?
2. Does the Complaint fail to state a claim under 18 U.S.C. §§ 2511, 2702(a)(1), 2702(a)(2), 2702(a)(3), and 47 U.S.C. § 605, where those statutes do not prohibit the foreign intelligence-gathering activities alleged in the Complaint?
3. Does the Complaint fail to state a claim for interception or surveillance?
4. Does the Complaint fail to state a claim under 18 U.S.C. § 2702(a)(3), where plaintiffs fail to plead facts that would constitute a “divulgence” under that statute?
5. Should the statutes upon which plaintiffs base their claims be construed as not applying to the alleged divulgence of records to the government in order to avoid a violation of the First Amendment to the United States Constitution?
6. Does federal law preempt plaintiffs’ state-law claims?
7. Do plaintiffs fail to state deception and breach-of-contract claims where plaintiffs (a) fail to allege any promises by MCI not to disclose call information, (b) fail to identify any contracts they assert Verizon breached, and (c) where the Verizon privacy policies they cite expressly permit the acts alleged?
8. Are the claims against MCI barred by the bankruptcy discharge?

1 On September 11, 2001, al Qaeda terrorists carried out the most lethal attack on the
2 American homeland in the country's history. On September 14, the President declared a national
3 emergency, stating that there was a "continuing and immediate threat of further attacks on the
4 United States." Presidential Proclamation 7463, 66 Fed. Reg. 48199. Congress passed the
5 Authorization for Use of Military Force ("AUMF"), declaring that the attacks "continue to pose an
6 unusual and extraordinary threat" to the country and calling on the President "to use all necessary
7 and appropriate force" against those he determines were responsible for the attacks in order to
8 prevent future attacks. Pub. L. 107-40, 50 U.S.C. § 1541 note.

9 Thirty-five thousand reservists and national guard troops were mobilized for homeland
10 defense. 66 Fed. Reg. 48201. The Pentagon launched "Operation Noble Eagle": fighters flew
11 Combat Air Patrols over New York and Washington 24-hours a day; interceptors were put on
12 around-the-clock alert at 26 airbases; Aegis cruisers were deployed to New York and other coastal
13 areas for air defense; troops in combat gear took up positions at airports, bridges, tunnels,
14 subways, and other sensitive sites throughout the New York and Washington areas.

15 Officials expected a "second wave" of attacks and feared that a "network of terrorists [was]
16 still in place for another wave of attacks."¹ On September 30, the country was warned that, when
17 the U.S. started operations in Afghanistan, there was a high probability of new attacks.² After
18 those operations began, on October 8, the Attorney General put all federal and state law
19 enforcement and corporate America on the "highest alert."³ On October 11, the FBI announced
20 that the government "had reason to believe" that new terrorist attacks might be launched within the
21 United States "over the next several days."⁴ It was reported that attacks were "imminent" and that
22 the CIA had gathered "highly credible" information "pointing to possible multiple attacks in the

28 ⁴ Dan Eggen & Bob Woodward, *Terrorist Attacks Imminent, FBI Warns*, Wash. Post, Oct. 12,
2001.

1 very near future” on a scale larger than 9/11.⁵ On October 29, the Attorney General announced
2 that there was credible information indicating the threat of terrorist attacks over “the next week”
3 and warned Americans to be “on highest alert.”⁶ Americans were told that “[g]overnment analysts
4 have been forced into broad agreement that the threat of terrorists wielding mass-casualty
5 weapons—chemical, biological or even nuclear—is more serious than they had believed.”⁷

6 This is the historical context in which the Master Complaint (“Complaint”) (Dkt. # 125)
7 alleges the government requested defendants’ help. Taking plaintiffs’ allegations as true for the
8 purposes of this motion only,⁸ the conduct alleged would have taken place during a national
9 defense emergency declared by Congress and the President, and, according to plaintiffs’
10 allegations, as part of an effort to defend the country against impending attacks by a foreign
11 enemy. This context bears directly on the proper legal analysis of plaintiffs’ claims.

12 Specifically, the President authorized the National Security Agency (“NSA”) to intercept
13 transnational calls of persons with known links to al Qaeda and related terrorist organizations.
14 Compl. ¶ 139. The President directed these activities, known as the Terrorist Surveillance
15 Program (“TSP”), to establish an early warning system “to detect and prevent” another terrorist
16 attack on the country. Alexander Decl. ¶ 10 (Dkt. # 254). In authorizing the TSP, the President
17 found these activities “necessary to the defense of the United States.”⁹ Although the Complaint
18 references the TSP, it does not allege that plaintiffs’ calls were subject to that targeted program.

19 The Complaint alleges that NSA also engaged in two other types of activities, neither of
20 which the government has acknowledged. First, based on two articles in *USA Today*, plaintiffs
21 allege that NSA obtained access to databases of call record information, i.e., data reflecting what
22 telephone numbers a given customer called. Compl. ¶¶ 149-152. Second, plaintiffs allege that

25 ⁷ William J. Broad, et al., *A Nation Challenged: The Threats; Assessing Risks, Chemical,*
Biological, Even Nuclear, N.Y. Times, Nov. 1, 2001.

26 ⁸ Nothing in this brief should be construed as an admission or denial regarding the existence of the
programs alleged in the Complaint or that defendants participated in any such alleged activities.

27 ⁹ U.S. Dep’t of Justice, *Legal Authorities Supporting the Activities of the National Security Agency*
Described by the President, 34-35 (Jan. 19, 2006), *available at*
28 <http://www.usdoj.gov/opa/whitepaperonnsalegalauthorities.pdf>.

1 NSA was given access to all or substantially all calls while in transmission, and that it used
2 computers to filter the content of those calls to search for words or phrases indicating that
3 particular calls warranted further scrutiny by intelligence officers. *Id.* ¶¶ 142-143, 168.

4 Rather than challenge NSA's alleged actions by suing the government directly, plaintiffs
5 seek to hold defendants liable for allegedly assisting NSA in carrying out these purported
6 programs. Plaintiffs allege that (1) NSA undertook these alleged programs to collect intelligence
7 to detect and prevent terrorist activities, *id.* ¶¶ 140, 145, 148; (2) as part of this alleged counter-
8 terrorism program, NSA asked defendants to assist it by providing access to call record
9 information and to their networks, *id.* ¶¶ 142, 149; (3) defendants agreed to provide the assistance
10 allegedly requested for the "purpose of assisting the government" in its efforts to prevent and
11 detect terrorist attacks, *id.* ¶ 259; and (4) NSA actually used the records and call content that it
12 obtained with defendants' alleged assistance in its counter-terrorism program, *id.* ¶¶ 142, 145, 164.

13 ARGUMENT

14 I. THE STATE-SECRETS DOCTRINE MANDATES DISMISSAL OF ALL CLAIMS

15 Defendants join the government's motion, which shows that the state-secrets privilege
16 requires dismissal of the Complaint. First, the Complaint falls into both categories requiring
17 dismissal—without the need for any granular analysis—because of the nature of the claims:
18 (1) those whose "very subject matter" are secret, and/or (2) those that would involve courts in
19 exposing, probing, or betraying alleged intelligence relationships between the executive and
20 private parties. Second, beyond these categorical rules, dismissal is required because a forward-
21 looking analysis reveals that full litigation of the claims would involve state secrets. As the
22 government has shown, and as amplified below, these doctrines bar litigation of each of the three
23 categories of activities alleged in the Complaint.

24 Records: In *Hepting v. AT&T*, the Court noted that the government has not acknowledged
25 that a records program exists or, if it did, how it worked or any role played by any particular
26 telecommunications provider, and on this basis prohibited plaintiffs from conducting discovery
27 with respect to the alleged records program. *See* 439 F. Supp. 2d 974, 997 (N.D. Cal. 2006). The
28 Court nevertheless stated that it was hesitant *at that time* to dismiss the records claims. *Id.*

1 Defendants respectfully suggest that now is the time to dismiss the records claims.

2 First, the “very subject matter” of plaintiffs’ challenge to the alleged records program is
3 secret. Alexander Decl. ¶ 12. Only the Executive can waive the state-secrets privilege, and it has
4 not done so with respect to that alleged program. Vague statements by Senators about a program,
5 Compl. ¶¶ 154-56, or statements attributed to unnamed members of Congress about MCI’s alleged
6 involvement, *id.* ¶ 158, cannot defeat the Executive’s invocation of the privilege. *See Salisbury v.*
7 *United States*, 690 F.2d 966, 971 (D.C. Cir. 1982) (congressional discussion of NSA methods
8 “cannot be equated with disclosure by the agency itself of its methods of information gathering”).

9 Second, if the alleged records program existed, the role, if any, that defendants played in it
10 would be shielded by the *Totten* doctrine, which prohibits litigation that would expose, probe, or
11 betray a confidential relationship the President has entered into with a private party to collect
12 intelligence. *See Totten v. United States*, 92 U.S. 105, 107 (1875); *Tenet v. Doe*, 544 U.S. 1, 11
13 (2005). Beyond harm to the alleged records program itself (if one existed), such litigation would
14 cause broader harms that *Totten* is designed to avoid. In *Totten* itself, there was no possibility that
15 litigation would harm the particular activity in which the alleged spy was involved; the case arose
16 years after the Civil War. *Totten* bars litigation probing intelligence-gathering relationships as a
17 *general category* in order to avoid damaging the Executive’s ability to obtain private help in *other*
18 cases and to avoid harming the agent. *See Totten*, 92 U.S. at 106 (confidentiality of spying
19 relationships should be maintained because disclosure of such relationships “might compromise or
20 embarrass our government in its public duties, or endanger the person or injure the character of the
21 agent”). Plaintiffs’ allegations fall squarely into this prohibited category.

22 Third, if a secret records program existed, the prospective evaluation that must be
23 undertaken now makes clear that the government’s invocation of the state-secrets privilege would
24 make the full and fair litigation of challenges to any such program impossible. State secrets would
25 not only prevent plaintiffs from making out a prima facie case, but also would deprive defendants
26 of evidence that could support their defenses. *See Kasza v. Browner*, 133 F.3d 1159, 1166 (9th
27 Cir. 1998) (court must evaluate impact that removal of secret evidence from case will have on both
28 prima facie case and on defenses). The state-secrets doctrine mandates dismissal not only when

1 secret matters would deprive a defendant of a defense entirely, but also when the defendant could
2 present its defense more fully if secrets were used to support it. When this is so, the state-secrets
3 doctrine mandates dismissal, for it would violate fundamental due process for the government to
4 subject a defendant to liability and at the same time deprive it of evidence that could be useful in
5 its defense. *See Philip Morris USA v. Williams*, 127 S. Ct. 1057, 1063 (2007) (Due Process Clause
6 prohibits “punishing an individual without first providing that individual with an opportunity to
7 present every available defense” (citation and internal quotation marks omitted)).

8 If a records program existed, the state-secrets privilege would prevent defendants from
9 presenting the most basic facts about it, such as what records were involved, how the government
10 accessed them, any controls over access, the predicate facts required for any government searches,
11 the results of those searches, the past and prospective usefulness of this information in detecting
12 and preventing terrorist attacks, the gravity and nature of the threat of future attacks, and what, if
13 anything, defendants were told about the foregoing by the government or learned through their
14 alleged participation in the alleged program. Alexander Decl. ¶¶ 12, 18. Because such facts might
15 be helpful to defendants’ case if they existed but have been rendered unavailable by the state-
16 secrets privilege, the records claims must be dismissed forthwith.

17 TSP: If the Complaint were read to challenge the legality of the TSP, the very subject
18 matter of that action would be a state secret because details as to the operation of that program
19 would be needed to adjudicate the claim. As the Fourth Circuit stated in a decision released after
20 this Court’s ruling in *Hepting*, the subject matter bar applies even when the existence of the
21 program has been acknowledged in general terms, but the operational details remain secret. *El-*
22 *Masri v. United States*, 479 F.3d 296, 308 (2007). While the government has described “the
23 general contours” of the TSP, *Hepting*, 439 F. Supp. 2d at 31, it has not disclosed specific
24 activities taken to implement that program. A challenge to the legality of those activities cannot be
25 pursued without revealing secret information. Alexander Decl. ¶¶ 12, 17 & n.4.

26 In addition, claims against defendants based on their alleged involvement in the TSP would
27 be categorically barred by *Totten*. In *Hepting*, the Court found *Totten* inapplicable based on its
28 observation that it was “unclear” whether the TSP could have existed without AT&T’s help, given

1 AT&T's "ubiquity." 439 F. Supp. 2d at 992. Putting aside whether the Court's inferences were
2 appropriate with respect to AT&T, the same inferences cannot be drawn as to MCI (which was a
3 far smaller long-distance carrier than AT&T) or Verizon (which was mainly a local service
4 provider). *Totten's* applicability, moreover, depends not on whether the judiciary can surmise that
5 a clandestine relationship may have existed, but rather on whether the Executive has stated that
6 any such relationship is secret. *Totten* is designed to prevent litigation that would confirm or
7 disprove the existence of such suspected relationships, as well as their nature and scope.

8 Any claims based on the TSP also could not be proven, or defenses presented fully and
9 fairly, without secret information. In particular, plaintiffs could not establish standing without
10 obtaining secret information about whose calls were actually intercepted. *Halkin v. Helms*, 690
11 F.2d 977, 998 (D.C. Cir. 1982) ("*Halkin II*") ("inability to adduce proof of actual acquisition of
12 their communications" made it impossible for plaintiffs to prove standing). This standing problem
13 cannot be deferred because it is apparent now that plaintiffs cannot establish standing and thus
14 cannot establish this Court's jurisdiction. Moreover, allowing plaintiffs to establish standing based
15 simply on the allegations of their complaint would be "unfair to the individual defendants who
16 would have no way to rebut it." *Halkin v. Helms*, 598 F.2d 1, 11 (D.C. Cir. 1978) ("*Halkin I*").
17 Beyond standing, the state-secrets privilege bars discovery of "the roles, if any, that the defendants
18 played in the events" plaintiffs allege—facts essential for plaintiffs to establish their claim and for
19 defendants to present a defense. *El-Masri*, 479 F.3d at 309.

20 Untargeted Access to Content: Similarly, the state-secrets doctrine requires dismissal of
21 plaintiffs' claims based on an alleged untargeted program of obtaining access to call content. The
22 government has denied that the TSP is a dragnet of content surveillance and has demonstrated that
23 proof of the matter would involve state secrets. Alexander Decl. ¶ 17. It would be a "mockery of
24 justice" to allow the case to proceed based solely on the allegations of the Complaint. *Molerio v.*
25 *FBI*, 749 F.2d 815, 825 (D.C. Cir. 1984). Moreover, as the government has shown, any challenge
26 to the government's assertion would necessarily involve secret facts about the scope and operation
27 of the TSP. Again, it would be unfair to the defendants to deprive them of evidence that could be
28 useful in rebutting plaintiffs' allegations. See *Halkin I*, 598 F.2d at 11.

1 **II. THE CALL CONTENT CLAIMS MUST BE DISMISSED (CLAIMS 3 AND 5)**

2 **A. Title III Does Not Apply To National Security Intelligence**

3 Plaintiffs' Third Claim—that defendants' alleged assistance in NSA's alleged program of
4 accessing the content of calls violated 18 U.S.C. § 2511—must be dismissed. Plaintiffs allege that
5 defendants provided this purported assistance for the purpose of helping the government in
6 preventing and detecting terrorist attacks. *See, e.g.*, Compl. ¶¶ 142, 145, 259. Thus, under
7 plaintiffs' allegations, the alleged surveillance was conducted for national security purposes.
8 Title III, including § 2511, however, applies solely to the interception of calls for law enforcement
9 purposes—not surveillance conducted for national security purposes. Claims regarding alleged
10 surveillance of content for national security purposes are governed exclusively by the Foreign
11 Intelligence Surveillance Act ("FISA").

12 When Congress enacted Title III in 1968, it expressly disclaimed any intent to curtail the
13 President's authority to conduct electronic surveillance for national security purposes:

14 Nothing contained in this chapter . . . shall limit the constitutional power of the President
15 to take such measures as he deems necessary to protect the Nation against actual or
16 potential attack or other hostile acts of a foreign power, [or] to obtain foreign intelligence
17 information deemed essential to the security of the United States

18 Pub. L. No. 90-351, § 802, 82 Stat. 214 (1968) (formerly codified at 18 U.S.C. § 2511(3)). In the
19 legislative history, Congress confirmed that "[n]othing in the proposed legislation seeks to disturb
20 the power of the President . . . when international relations and internal security are at stake."

21 S. Rep. No. 90-1097, *reprinted in* 1968 U.S.C.C.A.N. 2112, 2156-2157 (1968); *see also id.* at
22 2182. As the Supreme Court stated, Title III "simply did not legislate with respect to national
23 security surveillances." *United States v. United States Dist. Court*, 407 U.S. 297, 306 (1972).

24 When Congress later decided to regulate electronic surveillance for foreign intelligence and
25 national security, it did so *not* by extending the prohibitions and procedures of Title III to that area,
26 but by enacting a *separate* statute: the Foreign Intelligence Surveillance Act of 1978, Pub. L.
27 No. 95-511, 92 Stat. 1783. FISA regulates the collection of "foreign intelligence information,"
28 and thereby "complement[s]" Title III, "which deals with electronic surveillance for law
enforcement purposes." S. Rep. No. 95-604, at 63 (1977). FISA is situated in Title 50 ("War and

1 National Defense”), while Title III appears in Title 18 (“Crimes and Criminal Procedure”).

2 Consistent with this dual structure, FISA amended Title III to provide that various procedural
3 requirements in Title III apply only to law enforcement interceptions carried out pursuant to that
4 statute. *See* FISA §§ 201(e)-(h) (amending 18 U.S.C. §§ 2518, 2519).

5 FISA eliminated the national-security disclaimer that previously appeared in § 2511(3) and
6 replaced it with a provision stating that Title III and the new FISA were the “exclusive means” by
7 which the government can conduct electronic surveillance and the interception of domestic wire,
8 oral, and electronic communications. 18 U.S.C. § 2511(2)(f). The elimination of the disclaimer
9 was a “technical and conforming” amendment to Title III, S. Rep. No. 95-604, at 3, reflecting the
10 adoption of a new regime for national security surveillance. Congress did not thereby expand
11 Title III to apply to the subject matter that FISA was adopted to address. *United States v.*
12 *Koyomejian*, 970 F.2d 536, 541 (9th Cir. 1992 (en banc) (“All this section [§ 2511(2)(f)] means to
13 us, however, is that [FISA] is intended to be exclusive in its domain and Title III in its.” (quoting
14 *United States v. Torres*, 751 F.2d 875, 881 (7th Cir. 1984)). In short, the 1978 amendments did
15 not create two overlapping regimes, but two separate and complementary regimes covering
16 different fields—FISA for national security and Title III for law enforcement and all other matters.
17 *See United States v. Sarkissian*, 841 F.2d 959, 964-65 (9th Cir. 1988) (whether surveillance is
18 regulated by FISA or Title III depends on purpose of surveillance).

19 Consistent with this dual structure, Title III does not create a right of action for improper
20 surveillance for foreign intelligence purposes; the remedy for such surveillance arises solely under
21 FISA. *See* 50 U.S.C. §§ 1809, 1810. In enacting FISA, Congress *rejected* an amendment
22 extending the cause of action in § 2520 to electronic surveillance regulated by FISA.¹⁰ Moreover,
23 it would be absurd to construe the cause of action under Title III to apply to foreign intelligence
24 surveillance. FISA creates a cause of action for surveillance that violates FISA, but only for

25 _____
26 ¹⁰ The Senate would have amended 18 U.S.C. § 2520 to include a cause of action for surveillance in
27 violation of FISA. *See* S. 1566, 95th Cong., § 4(k) (as passed by Senate, Apr. 24, 1978). Congress
28 rejected that approach in favor of the House version, which created a separate cause of action under
FISA and did not extend the Title III cause of action to foreign intelligence surveillance. *See* H.R.
Rep. No. 95-1720, at 33-34 (1978) (Conf. Rep.); H. R. Rep. No. 95-1283, Pt. I, at 97-98 (1978).

1 aggrieved persons “other than a foreign power or an agent of a foreign power.” 50 U.S.C. § 1810.
2 No such limitation appears in the cause of action in Title III. *See* 18 U.S.C. § 2520. Construing
3 Title III to permit a plaintiff to seek damages for alleged foreign intelligence surveillance would
4 allow agents of a foreign power to seek relief for unauthorized wiretapping under § 2520, despite
5 Congress’s clear intent that such persons should be disqualified from suing.

6 **B. The Complaint Fails To State A Claim For Interception Or Surveillance**

7 The Third and Fifth Claims also fail because they do not allege facts establishing that
8 plaintiffs’ calls were “intercept[ed]” or subject to “electronic surveillance” under Title III and
9 FISA. Both statutes define the prohibited act as the “acquisition” of the contents of calls. 18
10 U.S.C. § 2510(4); 50 U.S.C. § 1801(f). Plaintiffs have not alleged that their calls were actually
11 listened to or recorded. At most, they allege that their calls may have been subject to a
12 computerized “sift[ing]” process, Compl. ¶¶ 142, 143, 144, 147, 164, whereby computers allegedly
13 applied search parameters to identify calls containing names, word, or phrases that warrant
14 “scrutiny by human eyes and ears.” *Id.* ¶ 147. But plaintiffs nowhere allege that their calls were
15 among those selected for such scrutiny. Nor could plaintiffs ever make such a showing: if a
16 computer-sifting program existed as alleged, the identity of any person whose calls were isolated
17 for human examination would be a state secret. Plaintiffs’ inability to show “actual acquisition of
18 *their* communications” prevents them “from stating a claim cognizable in the federal courts”
19 because it renders them incapable of establishing standing. *Halkin II*, 690 F.2d at 998-99
20 (emphasis added).

21 Nor can Plaintiffs state a claim under Title III or FISA merely by alleging that their calls
22 were subject to computerized sifting, as that process does not involve the “acquisition” of call
23 content. In *Halkin I*, the plaintiffs alleged that NSA computers “scan[ned]” “enormous numbers of
24 communications” using “watchlists” of words and phrases to select particular communications for
25 review by intelligence analysts. 598 F.2d at 4. The plaintiffs, whose names were on the
26 watchlists, brought claims under Title III and the Fourth Amendment for unlawful interception of
27 their communications. The court rejected “the plaintiff’s argument that the *acquisition* of a
28 plaintiff’s communications may be presumed from the existence of a name on the watchlist” and

1 held that, to establish that their calls were “acquired,” plaintiffs would need to prove that their calls
2 were selected by the computer for human examination. 598 F.2d at 11 (emphasis added). *Halkin I*
3 thus establishes that computer scanning, by itself, does not amount to the “acquisition” of calls or
4 permit the inference that scanning *led to* the acquisition of plaintiffs’ calls.

5 The reasoning in *Halkin I* is consistent with the Ninth Circuit’s discussion in *United States*
6 *v. Smith*, 155 F.3d 1051 (9th Cir. 1998). In *Smith*, the court distinguished an unlawful “intercept”
7 under Title III from illegal “access” to a stored communication under 18 U.S.C. § 2701: “The
8 word ‘intercept’ entails *actually* acquiring the contents of a communication, whereas the word
9 ‘access’ merely involves *being in position* to acquire the contents of a communication.” *Id.* at
10 1058 (emphasis in original). For instance, one could access a voicemail system by entering a
11 password and “roaming about” the system “without *listening to or recording*” any of the messages
12 it stores. *Id.* at 1058-59 (emphasis added). But a defendant who “retrieve[s] and record[s]” a
13 voicemail “crosse[s] the line” separating access from interception. *Id.* at 1058. Likewise, while
14 automated scanning of communications might be said to put one in “position to acquire the
15 contents of a communication,” it does not constitute “actually acquiring” contents that are not
16 retrieved and recorded. *See also Sanders v. Robert Bosch Corp.*, 38 F.3d 736, 742 (4th Cir. 1994)
17 (Title III requires “proof of listening or of preservation for listening purposes” and finding no
18 acquisition when a live microphone picked up sounds and transmitted them to the defendant’s
19 security control room).

20 C. The FISA Claim Must Be Dismissed

21 The only statute relevant to national security surveillance is FISA. Hence, if the Court
22 does not dismiss the case on state-secret grounds, and if standing could be established, then the
23 threshold legal issue would be whether any interception of content was prohibited by FISA, and if
24 so, whether such prohibition is constitutional. If the President was acting within his authority then
25 defendants could not be found to have violated any law for allegedly assisting the President. The
26 only court to have addressed the issue concluded that the President has such authority. *See In re*
27 *Sealed Case*, 310 F.3d 717, 742 (FISA Ct. Rev. 2002) (“[A]ll the other courts to have decided the
28 issue [have] held that the President did have inherent authority to conduct warrantless searches to

1 obtain foreign intelligence information *We take for granted that the President does have that*
2 *authority and, assuming that is so, FISA could not encroach on the President’s constitutional*
3 *power.”* (emphasis added)). To reach the *contrary* conclusion—that FISA validly restricts the
4 President’s constitutional authority—would require a finding that Congress’s interests outweigh
5 the needs of the Executive in the particular circumstances alleged in the Complaint. *See Nixon v.*
6 *Adm’r of Gen. Servs.*, 433 U.S. 425, 443 (1977). This finding, however, could not be made
7 without considering evidence regarding the nature of the al Qaeda threat and the importance of the
8 TSP in combating that threat—evidence that is shielded by the state-secrets privilege. Because
9 state secrets make it impossible to determine that the President lacked authority, the claims against
10 defendants for allegedly assisting the President must be dismissed.

11 **III. THE RECORDS CLAIM FAILS BECAUSE ECPA DOES NOT APPLY TO THE** 12 **FACTS ALLEGED (CLAIM 2)**

13 The Complaint alleges that, after 9/11, NSA requested access to call records as part of an
14 alleged program to prevent further terrorist attacks, Compl. ¶¶ 142, 149, and that defendants
15 voluntarily provided NSA such access, *id.* ¶¶ 146, 150, 167, 169, with the “intent to assist or [for
16 the] purpose of assisting the government” in its efforts to prevent and detect terrorist attacks, *id.*
17 ¶ 259. The Second Claim alleges that such assistance violated the Electronic Communications
18 Privacy Act (“ECPA”), 18 U.S.C. § 2702(a)(3). In addition to being barred by the state-secrets
19 doctrine, this claim fails as a matter of law.

20 **A. ECPA Does Not and Cannot Be Construed To Restrict the Collection of** 21 **Intelligence for National Defense Purposes**

22 1. In Title III and FISA, Congress recognized a clear distinction between the realms of law
23 enforcement and intelligence for national security. In ECPA, Congress restricted the provision of
24 call record information in the former realm; it exhibited no intent to address the President’s
25 constitutional authority to gather intelligence, much less to constrain that authority. ECPA neither
26 mentions the President nor addresses armed conflict. Rather, as an amendment to Title 18
27 (“Crimes and Criminal Procedure”), ECPA addresses how law enforcement officers obtain call
28 record information. ECPA was adopted to update Title III to take account of changes in
technology. House Rep. No. 99-647, at 17-19 (1986) (attached as Ex. 2); S. Rep. No. 99-541, at 2-

1 3 (1986). Thus, ECPA is *in pari materia* with Title III and has the same scope: it restricts the
2 government's access to evidence for criminal justice and administrative purposes, not its gathering
3 of intelligence for national security purposes. See H.R. Rep. No. 99-647, at 16 (purpose of ECPA
4 is to provide means for "federal law enforcement officers" to obtain records); cf. *Sanford's Estate*
5 v. *CIR*, 308 U.S. 39, 42-44 (1939) (gift tax statute must be read *in pari materia* with estate tax
6 statute, which it was intended to supplement). ECPA's codification in the same title and part of
7 the U.S. Code as Title III confirms that both provisions deal with law enforcement. See *Kansas v.*
8 *Hendricks*, 521 U.S. 346, 361 (1997) (objective of statute evidenced by placement in code).

9 The plain language of ECPA's records provisions confirms that it deals with law
10 enforcement. For example, it authorizes the government to obtain a court order requiring
11 disclosure of records by showing that they are relevant and material to a criminal investigation
12 (§ 2703(d)); permits the government to obtain records without court intervention by submitting a
13 request relevant to an investigation of telemarketing fraud (§ 2703(c)(1)(D)); and enables the
14 government to obtain an order directing the provider not to notify the customer of the provision of
15 records if there is a risk of flight from prosecution or intimidation of witnesses (§ 2705(b)). These
16 are workaday criminal justice matters, unrelated to the collection of defense intelligence.

17 Finally, in ECPA, Congress deliberately chose not to impair the government's ability to
18 obtain records through other lawful means. Section 2511(2)(f) provides that Title III, ECPA, and
19 FISA are the "exclusive means" by which the government can conduct "electronic *surveillance* . . .
20 and the *interception* of domestic wire, oral, and electronic communications." 18 U.S.C. § 2511
21 (emphases added). This exclusivity provision thus applies only to the acquisition of call content; it
22 *does not apply to records*. Although Congress amended § 2511(2)(f) in ECPA, it did not enlarge
23 the scope of "exclusivity" to cover records. Pub. L. 99-508, § 101(b). This shows that Congress
24 did not intend for ECPA to be the only way for the government lawfully to obtain records.

25 2. Under traditional canons of statutory construction, ECPA cannot be construed to limit
26 the President's ability to obtain information to defend the country because Congress has not made
27 a "clear statement" of intent to impinge upon the President's constitutional powers. Under
28 Article II, the President has the authority to direct the defense of the country in an armed conflict

1 and to repel foreign attack. *See Hamilton v. Dillin*, 88 U.S. 73, 87 (1874) (President “is
2 constitutionally invested with the entire charge of hostile operations”); *Johnson v. Eisentrager*, 339
3 U.S. 763, 788-89 (1950); *The Prize Cases*, 67 U.S. (2 Black) 635, 668-70 (1862); *Campbell v.*
4 *Clinton*, 203 F.3d 19, 27 (D.C. Cir. 2000) (Silberman, J., concurring) (“the President has
5 independent authority to repel aggressive acts by third parties even without specific congressional
6 authorization”); *id.* at 40 (Tatel, J., concurring) (similar). In undertaking such defensive actions,
7 moreover, an indispensable part of the President’s constitutional power is his authority to collect
8 intelligence concerning the identity, location, and plans of the enemy. *See Dep’t of Navy v. Egan*,
9 484 U.S. 518, 527-528 (1988); *United States v. Marchetti*, 466 F.2d 1309, 1315 (4th Cir. 1972)
10 (“Gathering intelligence information” is “within the President’s constitutional responsibility for the
11 security of the Nation as the Chief Executive and as Commander in Chief of our Armed forces.”).

12 Putting statutes aside, the President’s *constitutional* powers give him broad discretion to
13 obtain the requisite intelligence from any willing source, using the means he judges most effective
14 and timely, provided only that he respects constitutional rights. This constitutional power includes
15 the authority to enlist the voluntary assistance of private parties. *See Totten*, 92 U.S. at 106
16 (President authorized, as Commander-in-Chief, to enter into contract with secret agent); *see also*
17 *CIA v. Sims*, 471 U.S. 159, 171 (1985). Thus, the President may ask for and receive access to
18 business records that could help detect an attack. The Fourth Amendment is inapplicable in such
19 cases, and the President is not limited to the use of compulsory legal process to obtain the
20 information he needs. *See Smith v. Maryland*, 442 U.S. 735 (1979) (no Fourth Amendment
21 protection for call records). Construing ECPA to impede the President’s ability to enlist private
22 help, or to require him to use compulsory legal process to gather intelligence information, would
23 constrain the President’s exercise of defense powers that arise directly under Article II.

24 The Supreme Court has consistently held that statutes must not be read as curtailing the
25 President’s exercise of constitutional functions absent a clear statement that Congress had such a
26 purpose. *Franklin v. Massachusetts*, 505 U.S. 788, 800-01 (1992). This rule is based in part on
27 separation-of-powers and comity concerns: a court should not lightly ascribe to Congress the intent
28 to tread on the constitutional powers of a co-equal branch. “Out of respect for the separation of

1 powers and the unique constitutional position of the President,” an “express statement by
2 Congress” is required before concluding that it meant to regulate the President’s exercise of his
3 executive functions. *Id.* The “requirement of clear statement assures that the legislature has in fact
4 faced, and intended to bring into issue, the critical matters involved in the judicial decision.”
5 *United States v. Bass*, 404 U.S. 336, 349 (1971). The rule also reflects the *Ashwander* principle
6 that a court should not decide a serious constitutional question, especially involving conflicts
7 between the political branches, unless it must do so. *Public Citizen v. Dep’t of Justice*, 491 U.S.
8 440, 466 (1989) (“reluctance to decide constitutional issues is especially great” where they concern
9 the “relative powers of coordinate branches of government”); *Armstrong v. Bush*, 924 F.2d 282,
10 289 (D.C. Cir. 1991) (clear statement of intent to restrict President required because legislation
11 regulating presidential action raises serious constitutional questions). The clear statement rule
12 applies with special force when construing statutes that might impinge on “the authority of the
13 Executive in military and national security affairs.” *Egan*, 484 U.S. at 530. Thus, a court should
14 not construe a statute as constraining the President’s exercise of constitutional powers unless
15 Congress has forced the issue in unmistakable terms, foreclosing any other plausible construction.

16 For these reasons, 47 U.S.C. § 605, which prohibits divulging the content of calls, has been
17 held not to apply to the interception of the content of calls carried out on the President’s behalf for
18 the purpose of gathering foreign intelligence, even in peacetime. *United States v. Butenko*, 494
19 F.2d 593, 601 (3d Cir. 1974) (en banc). Noting the importance of gathering intelligence to the
20 President’s ability to fulfill his responsibilities, the court reasoned that construing § 605 to apply to
21 foreign intelligence “arguably would hamper . . . the President’s effective performance of his
22 duties in the foreign affairs field.” *Id.* Because Congress had not “address[ed] the statute’s
23 possible bearing on the President’s constitutional duties,” *id.*, the court followed the well-settled
24 principle that “[i]n the absence of any indication that the legislators considered the possible effect”
25 of the statute on the President’s constitutional responsibilities, the court “should not lightly ascribe
26 to Congress an intent” that the statute reach activities conducted by the President in furtherance of
27 those responsibilities. *Id.* ECPA likewise cannot be construed to regulate the President’s
28 collection of records for the purpose of gathering military intelligence against al Qaeda.

1 3. ECPA’s limited scope is confirmed by the contrast with FISA. Unlike ECPA, FISA
2 makes a “clear statement” of congressional intent to constrain the President’s constitutional powers
3 in the national security realm. FISA’s express purpose was to address the President’s use of
4 electronic surveillance to collect intelligence to support national security activities (an activity to
5 which Title III expressly did not apply). In adopting FISA, Congress expressly considered the
6 President’s inherent Article II authority; repealed an earlier provision that deferred to the
7 President’s constitutional authority with respect to national security surveillance; and, in its place,
8 explicitly stated that FISA was the “exclusive means” for conducting electronic surveillance for
9 such purposes, 18 U.S.C. § 2511(2)(f). FISA also specifically considered and addressed, to some
10 degree, the applicability of FISA in wartime, providing that, after a declaration of war, the
11 President could conduct warrantless surveillance for 15 days to give Congress time to consider
12 rules appropriate to the circumstances. 50 U.S.C. § 1811.

13 FISA’s legislative history confirms that Congress considered the President’s constitutional
14 powers and deliberately intended to limit those powers, to whatever extent Congress could, in the
15 case of foreign intelligence surveillance. Congressional subcommittees extensively examined the
16 extent to which the President’s authority to conduct electronic surveillance for foreign intelligence
17 purposes would or should be constrained by the legislation.¹¹ The FISA Conference Report quotes
18 Justice Jackson’s concurrence in *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579, 637
19 (1952), which sets forth a three-part framework for evaluating the extent of the President’s
20 constitutional power. The Report expresses Congress’s intent to place the President into zone 3 of
21 Justice Jackson’s framework, where the President can “rely only upon his own constitutional
22 powers minus any constitutional powers of Congress over the matter.” H.R. Rep. No. 95-1720, at
23 35 (Conf. Rep.).

24 ¹¹ See *Foreign Intelligence Surveillance Act of 1977: Hearings Before the Subcomm. on Criminal*
25 *Laws and Procedures of the Sen. Comm. on the Judiciary*, 95th Cong. (1977); *Foreign Intelligence*
26 *Electronic Surveillance: Hearings Before the Subcomm. on Legislation of the H. Permanent Select*
27 *Comm. on Intelligence*, 95th Cong. (1978); *Foreign Intelligence Surveillance Act of 1978:*
28 *Hearings Before the Subcomm. on Intelligence and the Rights of Americans of the Sen. Select*
Comm. on Intelligence, 95th Cong. (1978); *Foreign Intelligence Surveillance Act: Hearings Before*
the Subcomm. on Courts, Civil Liberties, and the Administration of Justice of the H. Comm. on the
Judiciary, 95th Cong. (1978).

1 Moreover, in seeking to restrict surveillance, Congress sought to give effect to what it saw
2 as a countervailing constitutional limit on the President's authority, namely, the Fourth
3 Amendment's protection of the content of calls. Whereas the Executive had asserted that no
4 warrant was required to intercept calls for foreign intelligence collection, Congress asserted its
5 position that such surveillance should be governed by a judicially-administered probable cause
6 standard. FISA's rules were thus designed to give effect to a constitutional limit.

7 Congress's intent to regulate the President's acquisition of national security information is
8 not only clearly stated in FISA, but was the statute's *raison d'être*. It is only the clarity of
9 Congress's purpose, the Fourth Amendment interests involved, and, especially, the statutory
10 mandate that FISA serve as the "exclusive means" of conducting foreign intelligence surveillance,
11 that allow the argument to be made that FISA relegates the President, when conducting warrantless
12 surveillance, to Justice Jackson's zone 3.

13 Whatever the merits of those arguments with regard to FISA's impact on content
14 interception, no comparable claim can be made with respect to ECPA and non-content intelligence
15 collection allegedly undertaken to defend the country in an armed conflict. In striking contrast to
16 FISA, ECPA contains no indication that Congress even considered, let alone intended to constrain,
17 the President's exercise of Article II powers. ECPA does not purport to impose any limitation on
18 the President, and ECPA nowhere states that it is the exclusive means by which the President can
19 obtain records. In even more striking contrast to FISA, ECPA is utterly silent about whether and
20 how it would apply in time of armed conflict. That silence is telling; it is inconceivable that
21 Congress would authorize, under FISA, the President to engage in limitless electronic surveillance
22 during the first fifteen days of a war, while restricting, under ECPA, the President from the far less
23 intrusive collection of *records* during the same crisis. It is similarly incredible to suppose that
24 Congress would authorize the divulgence of call records requested by the government to
25 investigate telemarketing fraud, *see* 18 U.S.C. § 2703(c)(1)(D), but not to protect the country from
26 attack. Likewise, it is wholly implausible to suggest that Congress gave states authority to pass
27 laws authorizing their agencies to compel the production of records for the most mundane
28 purposes, *see id.* § 2703(c)(2), yet implicitly curtailed the authority that the Constitution itself

1 gives the President to obtain such records. ECPA simply does not speak to the context of declared
2 hostilities and the President's authority as Commander-in-Chief.

3 Additionally, while under FISA Congress at least could claim that in constraining the
4 President it was giving effect to a constitutional limit, no comparable argument could be made
5 with respect to records. A clear statement of congressional intent to regulate the President's
6 constitutional authority in this context is imperative. Congress's ability to constrain the
7 President's constitutional authority to gather records for intelligence purposes, in the absence of
8 any countervailing constitutional limit, is at least dubious, and ECPA cannot be read as reflecting
9 an unexpressed intent to test these constitutional boundaries.

10 Section 2709 of ECPA, which grants the FBI additional authority to compel the production
11 of records in its "investigation of counterintelligence cases," S. Rep. 99-541, at 44 (1986),
12 confirms that ECPA's restrictions do not apply to the voluntary provision of records for national
13 security purposes. Section 2709 was originally included in the Intelligence Authorization Act for
14 Fiscal Year 1987. The Senate Committee Report on that Act states that telecommunications
15 carriers had been voluntarily providing call record information to the government in response to
16 requests in particular counterintelligence cases for years. S. Rep. No. 99-307, at 18-19 (1986)
17 (attached as Ex. 3) ("FBI has stated that most communications common carriers cooperate
18 voluntarily with the FBI in making available" telephone records; AT&T and the Department of
19 Justice had reached an agreement ten years earlier by which AT&T would provide access to such
20 information without a subpoena). Noting that certain state regulators had created obstacles to
21 providers' ability to supply such information voluntarily, the Report described this provision as
22 giving the FBI the authority to compel the production of records in order to "preempt[]" the states
23 and enable the FBI to continue receiving records as in the past. *Id.* at 19. The Report emphatically
24 stated that "[t]he new mandatory FBI authority for counterintelligence access to records *is in*
25 *addition to, and leaves in place, existing non-mandatory arrangements for FBI access based on*
26 *voluntary agreement by communications common carriers."* *Id.* (emphasis added). This provision
27 was later moved out of the Intelligence Authorization Act and added to ECPA. H.R. Rep. No. 99-
28 952, at 30 (1986) (Conf. Rep.) (conference report on the Intelligence Authorization Act did not

1 include the provision because it “is expected to become law as part of [ECPA]”). The Senate
2 Report on ECPA states that § 2709 “is substantially the same as language recently reported by the
3 Intelligence Committee,” S. Rep. No. 99-541, at 43 (1986), and it recapitulates the Intelligence
4 Committee’s rationale for granting the FBI authority to compel the production of telephone
5 records. The Senate Report on ECPA observes that “in states where public regulatory bodies have
6 created obstacles” to carriers’ voluntary provision of access to records for counterintelligence
7 purposes, “the FBI has been prevented from obtaining these records,” and that § 2709 would give
8 the FBI authority to “gain access on a mandatory basis” in these circumstances. *Id.* at 44.

9 This history makes clear that § 2709’s grant of additional authority to the FBI to compel
10 the production of records in a particular situation cannot be construed to suggest that ECPA
11 restricts the voluntary provision of call record information to the government for military
12 intelligence purposes. Certainly, the history of § 2709 defeats any suggestion that ECPA contains
13 a “clear statement” of intent to limit the President’s broad power to gather intelligence for national
14 defense purposes. Nor can the affirmative grant of power to compel the production of records in
15 § 2709 be taken as a “clear statement” of intent to limit the government’s ability to receive records
16 produced voluntarily, especially in the absence of any language indicating that the authority
17 granted in § 2709 was the “exclusive means” for the government to obtain records. Indeed, if
18 ECPA were construed as a general prohibition on the collection of records for intelligence
19 purposes—except to the extent the FBI can compel the production of such records for counter-
20 intelligence and counter-terrorism purposes—it would preclude the government from obtaining
21 records for many intelligence purposes outside the specific types of investigations mentioned in
22 § 2709, and would require the President to rely solely on the FBI as his source of intelligence
23 information of this kind. ECPA is devoid of any suggestion, let alone a “clear statement,” that
24 Congress intended such a radical—and constitutionally problematic¹²—restriction on Presidential

25 ¹² The President has constitutional authority to collect national security intelligence, and Congress
26 cannot override the President’s authority to decide how to allocate operational responsibility for
27 national defense activities by decreeing that he can gather military intelligence only through the
28 FBI. *See* 9 Op. Att’y Gen. 462, 468-69 (1860) (President “[a]s commander-in-chief of the army it
[has the] right to decide according to [his] own judgment what officer shall perform any particular
duty”); *see also Fleming v. Page*, 50 U.S. (9 How.) 603, 615 (1850).

1 power. On the contrary, ECPA's history shows that Congress had just the opposite intent—that it
2 wished to preserve the Executive's ability to obtain records through voluntary arrangements.

3 Because ECPA lacks a clear statement of intent to tie the President's hands in collecting
4 intelligence, ECPA cannot be construed to apply to defendants' alleged divulgence of records,
5 which plaintiffs allege was done to help the President prevent future attacks, Compl. ¶ 259.

6 **B. The AUMF Is Statutory Authority to Obtain Access to Call Record**
7 **Information**

8 Beyond his constitutional powers, Congress has given the President ample additional
9 authority in the specific matter of combating al Qaeda. Even if plaintiffs' allegations about records
10 were true, the AUMF would provide statutory authority to collect records as alleged.

11 The AUMF, 50 U.S.C. § 1541 note, calls on the President to use “all necessary and
12 appropriate force” to defend against “the unique and extraordinary” threats posed by al Qaeda. As
13 the Supreme Court has held, this language endorses the President's use of the full panoply of
14 traditional war-fighting powers against al Qaeda. *Hamdi v. Rumsfeld*, 542 U.S. 507, 518 (2004)
15 (plurality opinion); *id.* at 587 (Thomas, J., dissenting). While those powers are not unlimited,
16 *Hamdan v. Rumsfeld*, 126 S.Ct. 2749 (2006) (AUMF does not authorize trial by military
17 commission inconsistent with the laws of war), there can be no question that gathering intelligence
18 about an enemy is a “fundamental incident” of using force against that enemy. *Cf. Hamdi*, 542
19 U.S. at 519 (plurality); *id.* at 587-88 (Thomas, J., dissenting).

20 Indeed, the AUMF *specifically* invokes the power to gather intelligence. By calling on the
21 President to “determine” who was responsible for the 9/11 attacks, Congress necessarily confirmed
22 his authority to gather the facts needed to make that determination. Further, the AUMF's
23 authorization to use all necessary force “*to prevent future*” attacks necessarily includes the power
24 to learn where the enemy is and what their plans are *in advance*. If the AUMF “clearly and
25 unmistakably” authorized the detention of American citizens, *id.* at 519, then it even more “clearly
26 and unmistakably” granted authority to learn about al Qaeda's operations and plans.

27 Thus, in defending against further al Qaeda attacks, the President is exercising not only his
28 own constitutional powers but also the powers granted by Congress. And the powers conferred by

1 the AUMF must be construed broadly. Especially in the areas of foreign policy and national
2 security, “legislation closely related to the question of the President’s authority in a particular case
3 which evinces legislative intent to accord the President broad discretion may be considered to
4 ‘invite’ ‘measures on independent presidential responsibility.’” *Dames & Moore v. Regan*, 453
5 U.S. 654, 678 (1981). The broad powers granted by the AUMF in this specific conflict make it
6 even more implausible to construe ECPA to prohibit the collection of records as alleged.

7 The powers affirmatively granted in the AUMF do not, and could not, conflict with ECPA.
8 ECPA expressly contemplates that “statutory authorization” can exist outside of ECPA to obtain
9 call record information. 18 U.S.C. §§ 2703(e), 2707(e). The AUMF, as construed in *Hamdi*,
10 provides just such authorization in the *specific* case of al Qaeda, broadly authorizing the collection
11 of intelligence to defend against that particular enemy. Apart from ECPA’s inapplicability to
12 defense activities, the AUMF—the later-enacted statute specifically addressing this conflict—
13 governs. While some argue that § 2511(2)(f)’s exclusivity language with respect to call *content*
14 precludes construing the AUMF to authorize warrantless surveillance, there can be no comparable
15 claim as to ECPA’s *records* provisions. ECPA has no such exclusivity provision.

16 *Hamdi* sets forth the controlling analysis. There, the pre-existing statute, adopted
17 specifically to control emergency Executive detentions of citizens, provided: “No citizen shall be
18 imprisoned or otherwise detained by the United States except pursuant to an Act of Congress.”
19 The Supreme Court held that the AUMF’s authorization to use “all necessary and appropriate
20 force” against al Qaeda was such a subsequent authorization and “satisfied the [Non-Detention
21 Act’s] requirement that a detention be ‘pursuant to an Act of Congress.’” *Hamdi*, 542 U.S. at 517
22 (plurality opinion); *see also id.* at 587 (Thomas, J., dissenting). The AUMF also authorizes the
23 collection of intelligence information to deal with al Qaeda and thus constitutes “statutory
24 authorization” within the meaning of ECPA.

25 C. The Emergency Exception Applies

26 ECPA’s prohibitions do not reach national defense activities. But if ECPA were found to
27 apply to such activities, its provision authorizing disclosure in the case of “an emergency involving
28 danger of death or serious physical injury” would also apply. 18 U.S.C. § 2702(c)(4). That

1 language encompasses a broad range of exigent circumstances and would certainly be capacious
2 enough to cover the threat that was of paramount national concern: that foreign operatives were
3 stealthily insinuating themselves into the United States to carry out sudden and massive attacks. In
4 the AUMF, Congress declared that acts of terrorism “continue to pose an unusual and
5 extraordinary threat to the national security.” 115 Stat. 224. The President declared that a
6 “national emergency exists” by reason of the 9/11 attacks and “the continuing and immediate
7 threat of further attacks on the United States,” 50 U.S.C. § 1621 note, a determination he has
8 renewed annually.¹³ These findings by the political branches conclusively establish the existence
9 of an emergency involving the danger of death or serious physical injury. In addition, the
10 Complaint itself alleges that the call record information related to the emergency: allegedly,
11 defendants provided access to this information in response to a government request for assistance,
12 and it was actually used by the government in its alleged counter-terrorism program. Accepting
13 these allegations as true, the activities alleged fall within the emergency exception as a matter of
14 law.

15 The clear statement rule requires this conclusion. Because ECPA lacks any clear indication
16 of intent to restrict the President’s defense intelligence activities, the emergency exception must be
17 construed consistent with the presumption that Congress did not wish to intrude into the
18 constitutional powers of a co-equal branch. Moreover, a serious constitutional problem would
19 arise if ECPA’s emergency exception were construed narrowly to impede the President’s ability to
20 obtain information he judges useful in defending the country. Because it is “fairly possible” to
21 construe the emergency exception to permit the activities alleged, it must be so construed. *See INS*
22 *v. St. Cyr*, 533 U.S. 289, 299-300 (2001) (“[I]f an otherwise acceptable construction of a statute
23 would raise serious constitutional problems, and where an alternative interpretation of the statute is
24 ‘fairly possible,’ [a court is] obligated to construe the statute to avoid such problems.”). Nor can
25 the inevitable conclusion that the emergency exception must apply be evaded or deferred by
26 suggesting that its application turns on a factually intensive inquiry into the provider’s subjective

27 ¹³ *See* 66 Fed. Reg. 48,199 (2001); 67 Fed. Reg. 58,317 (2002); 68 Fed. Reg. 53,665 (2003); 69
28 Fed. Reg. 55,313 (2004); 70 Fed. Reg. 54,229 (2005); 71 Fed. Reg. 52,733 (2006).

1 state of mind. The President has constitutional power to collect information that may be useful in
2 defending the country, regardless of the provider's motives. Thus, to avoid a conflict with
3 Article II, ECPA cannot be read to condition the President's access to information in a defense
4 crisis on the subjective perceptions or motives of the provider. In addition, requiring a provider to
5 endure a protracted proceeding to test its subjective state of mind would deter providers from
6 voluntarily cooperating with the President, which also would impair his ability to collect
7 information.

8 **D. The State-Secrets Privilege Requires Dismissal Of The Records Claim**

9 For the foregoing reasons, ECPA must be interpreted not to apply to the alleged records
10 program. A contrary conclusion would require the Court to confront whether, if the alleged
11 records program existed and operated as plaintiffs claim, Congress had the power to restrict the
12 President's authority under the Constitution to collect intelligence in this way. As noted, this
13 would entail a balancing of Congress's interests in regulating the President against the needs of the
14 Executive in the particular circumstances alleged in the Complaint. *See Nixon*, 433 U.S. at 443. If
15 the alleged records program existed, this balancing could not be undertaken without access to facts
16 covered by the state-secrets privilege. *See Alexander Decl.* ¶ 12.

17 **IV. IF ECPA'S RECORDS PROVISIONS WERE APPLICABLE, THE SECOND 18 CLAIM NEVERTHELESS FAILS AS A MATTER OF LAW**

19 Even if ECPA applied to the alleged records program, and even if the state-secrets
20 privilege could be overcome, the Second Claim must be dismissed for two reasons. First, plaintiffs
21 have failed to plead the "divulgence" required to make out a claim under § 2702(a)(3). Second,
22 the activities alleged are protected from liability by the Free Speech and Petition Clauses of the
23 First Amendment; ECPA must be construed not to impose liability for such activities.

24 The Second Claim alleges that defendants divulged "call-detail records," reflecting the
25 "date, time, duration and telephone numbers of calls placed or received." Compl. ¶ 136. The
26 Complaint alleges that access to such records was provided through a two-step process: first, call
27 record information was put into a database, *id.* ¶¶ 149-150, 158, 171, 172, and then NSA was
28 allowed to run computer programs against it to extract relevant information, *id.* ¶¶ 147, 164.

1 Plaintiffs allege that this “data mining” process involved the use of “[c]omputer-controlled
2 systems” to “sift” record data through “[s]uccessive stages of filtering” before “selecting the ones
3 for scrutiny by human eyes.” *Id.* ¶ 147. This automated winnowing allegedly allowed extraction
4 of information about “persons whose communications patterns the government believes may link
5 them, even if indirectly, to investigatory targets.” *Id.* ¶ 166. More specifically, the Complaint
6 alleges, NSA used this process “to determine exactly whom suspected [al] Qaeda figures were
7 calling in the United States and abroad and who else was calling those numbers.” *Id.* ¶ 145.

8 Even if the alleged records program existed and operated as plaintiffs describe, their
9 characterization depicts a sifting process, in which only a subset of data is extracted based on its
10 suspected link to terrorism. Plaintiffs allege that this process involves correlating data from
11 different sources to find a match or link to terrorist activities. Under the scenario portrayed by
12 plaintiffs, if the government learned the number of a foreign phone used by an al Qaeda agent
13 planning an attack in the United States, a computer would be used to “determine . . . who else was
14 calling” that number, *id.* ¶ 145, by running the foreign numbers against a database of calls made
15 from the United States, *id.* ¶ 164, for the purpose of identifying potential al Qaeda operatives in the
16 United States, *id.* ¶ 166.

17 **A. Defendants’ Alleged Provision Of Call Records For Inclusion In A Database**
18 **Does Not Constitute The “Divulgence” Of Records**

19 ECPA states that a provider may not “divulge” a record or other information pertaining to a
20 subscriber to the government. 18 U.S.C. § 2702(a)(3). Plaintiffs cannot establish a violation of
21 ECPA simply by alleging that information about them was put into a database that was subject to
22 being electronically queried. Information is “divulged” only when it is actually *made known* to
23 another person. Each plaintiff must plead and prove that information about him or her was
24 actually extracted from the database and *divulged* to someone in the government. Because the
25 Complaint lacks this essential allegation, the Second Claim must be dismissed.

26 The verb “divulge” means to make information known to another. It comes from the Latin
27 verb *divulgare*, which means to publish among the common people. American Heritage
28 Dictionary 413 (2d ed. 1985). The indispensable core of its meaning has always been that

1 previously secret information is actually made known to another person. *See* Black’s Law
2 Dictionary 480 (6th ed. 1990) (defining “divulge” as “[t]o disclose or make known, as to divulge
3 secret or classified information”); Webster’s Third New International Dictionary 664 (2002)
4 (defining “divulge” as “to tell or make known (a secret or confidence or what had been previously
5 unknown)”); American Heritage Dictionary 544 (3d ed. 1996) (defining “divulge” as “[t]o make
6 known (something private or secret)”). The clear connotation of the word is that the act of
7 “divulging” is not complete until the secrecy is extinguished by the information being apprehended
8 by another. Merely making information available to another, without more, does not constitute
9 “divulgence.” If one leaves a confidential document in a mailbox, the information in that
10 document is not “divulged” unless someone actually retrieves the document and reads it.

11 The language of federal privacy laws is to be construed in light of comparable common law
12 concepts, including defamation. *Oja v. U.S. Army Corps of Eng’rs*, 440 F.3d 1122, 1129 (9th Cir.
13 2006). “Divulge” as used in ECPA is analogous to “publication” in libel law; indeed, the term
14 “publish” is sometimes used in defining divulge. *See* Webster’s at 664; American Heritage
15 Dictionary.

16 Defamation law requires a plaintiff to prove that a defendant “published” defamatory
17 statements about him. To show publication, a plaintiff must prove that a defamatory statement
18 was actually made known to a third party. *See* Restatement (Second) of Torts § 577; *id.*, cmt. b. It
19 is not enough to show that information was made available to others; it must be shown that another
20 person actually apprehended the information. *Id.*, cmt. d (words spoken in a foreign language are
21 not published if not heard by one who understands the language). Thus, placing defamatory
22 information in a file that is available to be viewed by others is not a publication, absent evidence
23 that someone actually read the file. *Pinkney v. District of Columbia*, 439 F.Supp. 519 (D.D.C.
24 1977); *LaMon v. City of Westport*, 44 Wash.App. 664, 668-69 (1986); *Pressley v. Cont. Can Co.*,
25 250 S.E.2d 676, 677 (N.C. App. 1979). Similarly, in the context of electronic information, a
26 plaintiff must prove that libelous materials were not merely delivered to a computer but also read
27 by a human being. *Mills v. Wex-Tex Industries*, 991 F.Supp. 1370 (M.D. Ala 1997) (document
28 saved on a computer was not published because there was no evidence that anyone other than the

1 plaintiff and the author actually read it); *Mars, Inc. v. Gonzalez*, 71 S.W.3d 434 (Tex. App. 2002)
2 (sending libelous statements in an e-mail or a fax did not constitute publication absent evidence
3 that those communications were received by a third person); *Morrow v. II Morrow Inc.*, 911 P.2d
4 964 (Or. App. 1996) (saving a document to a computer network was not publication).

5 The words surrounding “divulge” in § 2702 reinforce this meaning. As used in
6 § 2702(a)(3), the object of the verb “divulge” is “a” record (or other information) about “a”
7 customer. The prohibition is thus directed at making known specific information about a specific
8 customer. Section 2702 does not address providing access to a system of records or a database. If
9 Congress intended to prohibit providing access to a database, it would have chosen a broader word
10 than “divulge,” such as to “provide” or to “send” information, and would have applied the
11 restriction to entire record systems rather than only to specific records of specific customers.

12 The narrow meaning of “divulge” is further confirmed by ECPA’s use of different
13 language to address precisely the kind of conduct alleged by plaintiffs: providing access to
14 databases. In neighboring § 2701(a), Congress described conduct that does not necessarily involve
15 divulgence of information but that does involve access to facilities that may house such
16 information. That section speaks in terms of “accessing” a “facility.” As the Ninth Circuit noted
17 in a different context, “[a]ccess does not necessarily mean disclosure.” *Planned Parenthood of*
18 *Southern Arizona v. Lawall*, 307 F.3d 783, 788 n.5 (9th Cir. 2002).

19 The Complaint, however, does not allege that information about each plaintiff was actually
20 extracted from a database and *divulged* to someone in the government. Instead, plaintiffs allege
21 only that defendants provided NSA access to databases that NSA could search, Compl. ¶¶ 146,
22 167, 197, not that any information about them was actually “divulged” to any person in the
23 government. Moreover, the “data mining” process alleged in the Complaint, in which computers
24 “sift” information “before selecting the ones for scrutiny by human eyes,” *id.* ¶ 147, means that
25 only a select few records would ever be seen by any person in the government. *Cf.* Richard A.
26 Posner, *Not a Suicide Pact: The Constitution in a Time of National Emergency* (Oxford Univ.
27 Press 2006), p. 97 (“Rather than invading privacy, computer sifting prevents most private data
28 from being read by an intelligence officer or other human being by filtering them out.”). Nor does

1 the Complaint allege that the records allegedly communicated by the defendants to the government
2 were in a form that identifies which customers are associated with which records, absent additional
3 actions that might be taken after the government's computer isolates particular records as
4 warranting additional investigation.

5 **B. Plaintiffs' Records Claim Under ECPA Must Be Dismissed Because It Seeks to**
6 **Hold Defendants Liable For Activity Protected by the First Amendment**

7 There is a fundamental constitutional right to communicate information to the government
8 to help it protect public peace and safety. When the country is engaged in an armed conflict with
9 foreign enemies, that right applies to communicating information that may be useful in defending
10 the country from expected attacks. Based on plaintiffs' own allegations, defendants' right to
11 communicate such information to the government is fully protected by the Free Speech and
12 Petition Clauses of the First Amendment, and is a privilege and immunity that arises directly under
13 the federal Constitution. Any construction of ECPA that purported to prohibit such
14 communications, and to subject defendants to monetary liability for engaging in the
15 communications alleged, would violate these constitutional rights.

16 Under *Ashwander*, because it is "fairly possible" to construe ECPA to avoid these serious
17 constitutional problems, *see St. Cyr*, 533 U.S. at 299-300, ECPA must be so construed. ECPA
18 expressly allows carriers to communicate information to the government to address emergencies
19 involving a serious danger to the public or to protect the carrier's property. *See* 18 U.S.C.
20 § 2702(c)(4), (c)(3). Not only is it "fairly possible" to read the emergency and property exceptions
21 to permit the communications that allegedly occurred in the context of the "unusual and
22 extraordinary threat" recognized by Congress and the President, but it would be unreasonable to
23 read the statute in any other way. In any event, *Ashwander* mandates that these provisions be
24 construed to allow the communications alleged by the Complaint, *as a matter of law*.

25 The First Amendment also requires the Court to resolve this legal issue at this stage of the
26 proceeding. Because "discovery can be both harassing and expensive" and "large damages [are]
27 usually claimed . . . and sometimes awarded, an action [challenging petitioning activity] can be,
28 from the very beginning, a most potent weapon to deter the exercise of First Amendment rights."

1 *Franchise Realty Interstate Corp. v. San Francisco Local Joint Exec. Bd. of Culinary Workers*,
2 542 F.2d 1076, 1082 (9th Cir. 1976). Accordingly, the Court should determine whether plaintiffs'
3 allegations impermissibly attack constitutionally protected activity at the motion-to-dismiss stage.
4 *See id.*; *see also Boone v. Redevelopment Agency of City of San Jose*, 841 F.2d 886, 894 (9th Cir.
5 1988) (noting importance of examining First Amendment argument at the pleading stage “[i]n
6 order not to chill legitimate” petitioning activity).

7 1. Defendants’ Alleged Communications Are “Speech” Protected by the First
8 Amendment

9 The gravamen of plaintiffs’ records claims is that defendants allegedly communicated
10 “information” about them to the government—namely, that a call was placed from a certain
11 telephone number to another number. Compl. ¶ 218. Communicating such factual information to
12 the government would be speech that is fully protected by the First Amendment.

13 The essence of speech is the communication of information. *Giebel v. Sylvester*, 244 F.3d
14 1182, 1187 (9th Cir. 2001) (“[B]ecause Giebel’s handbill was designed to convey information, it
15 constitutes a form of speech protected by the First Amendment.” (emphasis added)). “Even dry
16 information, devoid of advocacy, political relevance, or artistic expression, has been accorded First
17 Amendment protection.” *Universal City Studios, Inc. v. Corley*, 273 F.3d 429, 446 (2d Cir. 2001);
18 *see also Landmark Commc’ns, Inc. v. Virginia*, 435 U.S. 829, 838-39 (1978) (publication of name
19 of judge who was the subject of a disciplinary proceeding was “accurate factual information” that
20 was “near the core of the First Amendment”); *Junger v. Dailey*, 209 F.3d 481 (6th Cir. 2000)
21 (communication of computer source code is speech).

22 *Bartnicki v. Vopper*, 532 U.S. 514 (2001), establishes that the disclosure of call information
23 constitutes speech. In *Bartnicki*, an unknown person unlawfully intercepted and recorded a phone
24 call and delivered that recording to Jack Yocum, who in turn delivered it to a radio station, which
25 played it on the air. *Id.* at 519. Plaintiffs sued under Title III and its state counterpart, which
26 imposed liability on one who “discloses” the content of a call that the person has reason to know
27 was unlawfully obtained. *Id.* at 520 n.3. The Court held that the claim was barred by the First
28 Amendment. *Id.* at 518. The Court concluded that “the naked prohibition against disclosures is

1 fairly characterized as a regulation of pure speech.” *Id.* at 526 (emphasis added). The Court made
2 no distinction between Yocum and the radio station, finding that they both engaged in speech. *Id.*
3 at 525 n.8. Yocum engaged in speech by handing over the tape because his purpose was to convey
4 whatever information was contained on the tape—not because the tape contained a conversation
5 between two other people. The Court concluded: “given that *the purpose of such a delivery is to*
6 *provide the recipient with the text of recorded statements*, it is like the delivery of a handbill or a
7 pamphlet, and as such, it is the kind of ‘speech’ that the First Amendment protects.” *Id.* at 527
8 (emphasis added, footnote omitted). Similarly, because the Complaint alleges that the “purpose”
9 of the defendants’ alleged “disclosure” of call records was to provide the government with
10 “information” about the calls reflected in such records, Compl. ¶¶ 259, 226, 218, plaintiffs’ records
11 claims seek to impose liability for engaging in speech.

12 Even the commercial sale to private parties of large quantities of personal information
13 culled from databases is speech under the First Amendment. *Trans Union Corp. v. FTC*, 245 F.3d
14 809, 818 (D.C. Cir. 2001) (sale of marketing lists is speech), *on rehearing*, 267 F.3d 1138, 1140
15 (D.C. Cir. 2001) (same; referring to sale of marketing lists as “targeted speech”); *U.D. Registry,*
16 *Inc. v. California*, 34 Cal. App. 4th 107, 109-10 (1995) (sale of databases containing truthful
17 information about prospective renters is speech); *Equifax Services, Inc. v. Cohen*, 420 A.2d 189,
18 198 (Maine 1980) (sale of credit reports is speech); *see also BellSouth Corp. v. FCC*, 144 F.3d 58,
19 67 (D.C. Cir. 1998) (telephone companies’ dissemination of databases and other information is
20 “expressive activity within the scope of the First Amendment”). There can be no doubt that the
21 voluntary provision of such information to the government is speech.

22 The fact that ECPA gives the government the discretion to *compel* the communication of
23 records does not change ECPA’s character as a flat prohibition on speech. The government may
24 not prohibit persons from *voluntarily* speaking simply by reserving the prerogative to compel the
25 provision of information when it chooses to do so. “We are aware of no general principle that
26 freedom of speech may be abridged when the speaker’s listeners could come by his message by
27 some other means *such as seeking him out and asking him what it is.*” *Virginia State Bd. of*
28 *Pharmacy v. Virginia Citizens Consumer Council*, 425 U.S. 748, 757 n.15 (1976) (emphasis

1 added). The Constitution places the decision about the need to speak in the hands of the speaker,
2 not the government. *See, e.g., City of Lakewood v. Plain Dealer Pub. Co.*, 486 U.S. 750, 758
3 (1988) (prohibiting speech unless and until government demands it is an invalid prior restraint).

4 2. Defendants Cannot Be Held Liable for Their Alleged Petitioning Activity

5 The alleged communication of call records is protected not just as speech, but also as
6 petitioning activity. The Petition Clause protects communications made to a branch of government
7 concerning a proper subject for that branch to act on. *See Eastern R.R. President's Conference v.*
8 *Noerr Motor Freight, Inc.*, 365 U.S. 127, 137 (1961); *California Motor Transp. Co. v. Trucking*
9 *Unlimited*, 404 U.S. 508, 510 (1972). Communicating facts to the government is protected
10 petitioning activity. *See Boone*, 841 F.2d at 894; *see also Noerr*, 365 U.S. at 139 (describing as
11 protected those “who provide much of the information upon which government must act”).
12 Petitions are protected without regard to the petitioners’ purpose or intent. *Prof'l Real Estate*
13 *Investors, Inc. v. Columbia Pictures Indus., Inc.*, 508 U.S. 49, 58 (1993).

14 The *Noerr-Pennington* doctrine, which implements the right to petition, provides that those
15 who petition the government are “immune from liability for statutory violations, notwithstanding
16 the fact that their activity might otherwise be proscribed by the statute involved.” *White v. Lee*,
17 227 F.3d 1214, 1231 (9th Cir. 2000). While originally developed under the antitrust laws, the
18 *Noerr-Pennington* rule precludes liability under *any* statute “that could implicate the rights
19 protected by the Petition Clause.” *Sosa v. DIRECTV*, 437 F.3d 923, 931 (9th Cir. 2006).

20 Communications to the government in connection with the investigation and prevention of
21 threats to public safety are protected as petitioning activity under *Noerr-Pennington*. The
22 Executive Branch is responsible for protecting the safety of the public, and communicating
23 information to the Executive to enable it to carry out that function is petitioning activity protected
24 by the First Amendment. Accordingly, the Ninth Circuit has held that “citizen communications
25 with police” are petitioning activities covered by *Noerr-Pennington*. *Forro Precision, Inc. v. IBM*
26 *Corp.*, 673 F.2d 1045, 1060 (9th Cir. 1982); *see also King v. Idaho Funeral Serv. Ass'n*, 862 F.2d
27 744, 745 (9th Cir. 1988) (report to state officials that caskets were being sold without a required
28 license); *Ottensmeyer v. Chesapeake & Potomac Tel. Co.*, 756 F.2d 986, 994 (4th Cir. 1985)

1 (following *Forro*, report to police about suspected tariff violations); *Brownsville Golden Age*
2 *Nursing Home, Inc. v. Wells*, 839 F.2d 155, 160 (3d Cir. 1988) (reports on alleged regulatory
3 violations by nursing home); *Arim v. General Motors Corp.*, 520 N.W.2d 695, 700 (Mich. Ct. App.
4 1994) (per curiam) (defendant's "assistance and cooperation" with law enforcement operation,
5 including the provision of cars and other facilities, were protected under the First Amendment).
6 The purpose of assisting the government is bound up with the purpose of enlisting the government
7 in carrying out its protective function.

8 While, for obvious reasons, the petitioning cases have arisen mainly in the law enforcement
9 arena, the Petition Clause even more strongly protects the communication of information to the
10 Executive to assist in protecting the nation against foreign attack. The threat to the body politic
11 posed by a foreign enemy is of an entirely different and graver kind than that posed by ordinary
12 criminals. Foreign enemies threaten to inflict far greater death and destruction and seek to impose
13 their will on our nation by force of arms, thus eviscerating the very essence of our self-governance.
14 Especially when an armed conflict has been declared, a private citizen's voluntary communication
15 of information that may be useful in protecting the country from foreign enemies is of paramount
16 public importance and entitled to the highest level of constitutional protection.

17 Apart from the Petition Clause, there is a fundamental constitutional right to provide
18 information to the government that may be of assistance to the government in protecting the safety
19 of the public at large. In *In re Quarles*, 158 U.S. 532, 535-36 (1894), the Supreme Court
20 recognized that every citizen has "the duty and the right" to "assist in prosecuting, and in securing
21 the punishment of, any breach of the peace," which includes the right and duty "to communicate to
22 the executive officers any information which he has of the commission of an offence against those
23 laws." *Id.* at 535. The Court emphasized that this right "does not depend upon any of the
24 Amendments to the Constitution, but arises out of the creation and establishment by the
25 Constitution itself of a national government." *Id.* at 536. The *Quarles* principle has been
26 reaffirmed many times. See, e.g., *Chapman v. Houston Welfare Rights Org.*, 441 U.S. 600, 513
27 n.29 (1978); *In re Sacred Heart Hospital*, 133 F.3d 237, 245 n.11 (3d Cir. 1998).

28 These constitutional protections carry over and expand on a principle as old as the common

1 law itself: persons have a right and duty to assist government authorities in protecting the public
2 peace. That right extends not only to providing physical assistance, Restatement (Second) of Torts
3 § 139(2), but has always been understood to encompass the communication of information that
4 aids officials in protecting the public, *id.* § 598 & cmts. d & e. The common law protection is
5 based largely on society's interest in encouraging such assistance. But the Constitution goes
6 further. It not only recognizes society's interest, but also establishes that engaging in such
7 communication is a fundamental personal right, integral to self-governance.

8 The Petition Clause also protects a breathing space around petitions. *BE&K Construction*
9 *Co. v. NLRB*, 536 U.S. 516, 531 (2002); *Sosa*, 437 F.3d at 931-32. This breathing space is
10 deliberately “overprotect[ive]” so as to avoid chilling petitioning activity. *See Sosa*, 437 F.3d at
11 933. Under this breathing space principle, conduct incidental to petitions, such as discovery in a
12 lawsuit, is protected. *Id.* at 935. Likewise, *Noerr-Pennington* immunity is not limited to
13 successful petitions. *BE&K*, 536 U.S. at 531. Litigation activity loses its protected character only
14 if it is *both* objectively baseless *and* subjectively motivated by an improper purpose. *Prof'l Real*
15 *Estate Investors*, 508 U.S. at 60-61. If the plaintiff fails to plead facts showing that the litigation is
16 objectively baseless, however, the Complaint must be dismissed, without any inquiry into the
17 defendant's subjective motivation. *See id.* at 60 (court may not examine subjective motives until
18 after plaintiff establishes that the litigation is objectively baseless).

19 *Noerr-Pennington's* protection is wider still when the petitioning activity involves assisting
20 the government protect public safety. The scope of *Noerr-Pennington* immunity “depends on the
21 degree of political discretion exercised by the government agency.” *Kottle v. Northwest Kidney*
22 *Ctrs.*, 146 F.3d 1056, 1062 (9th Cir. 1998) (quoting *Forro*, 673 F.2d at 1060 n.10). Thus, *Noerr-*
23 *Pennington* immunizes a wider range of activity in the legislative than in the judicial realm,
24 because legislators and constituents have wider discretion in how they act on and communicate
25 information than do courts and litigants. *Kottle*, 146 F.3d at 1061 (area of unprotected activity in
26 legislative realm is “extraordinarily narrow”). In the law enforcement context, the scope of
27 discretion—and hence the scope of protection afforded to private citizens—is even wider than in
28 the legislative context. *Id.* at 1062. Liability may not be imposed unless a defendant's assistance

1 to the government had no conceivable relationship to a legitimate law enforcement objective.

2 The Complaint must be dismissed because it seeks to impose liability on defendants for
3 allegedly engaging in protected petitioning activity. The records claim is premised on the
4 allegation that defendants cooperated with NSA by communicating call information as part of the
5 government's effort to detect and thwart terrorist attacks. Such communications are protected as
6 petitions. *See, e.g., Forro*, 673 F.2d at 1060. Even if they were not, all of the acts alleged are
7 within the wide breathing space afforded those who assist the government in protecting public
8 safety. *See Kottle*, 146 F.3d at 1062. Accordingly, *Noerr-Pennington* immunizes the conduct
9 alleged and requires that plaintiffs' records claim be dismissed. *See, e.g., Sosa*, 437 F.3d at 942
10 (affirming dismissal of complaint under Rule 12(b)(6) based on *Noerr-Pennington*); *Kottle*, 147
11 F.3d at 1059-60 (same).

12 3. Defendants Cannot Be Held Liable for Their Alleged Speech

13 Plaintiffs' attempt to impose liability under ECPA is also barred by the Free Speech
14 Clause. A complete prohibition on truthful speech to the government about information lawfully
15 acquired and involving political speech and speech on matters of public concern would violate the
16 First Amendment on numerous grounds, as discussed below. There are two overarching flaws.
17 First, an outright prohibition on truthful speech about information lawfully acquired is anathema to
18 the First Amendment. Second, a ban on such speech is not narrowly tailored to achieve the
19 objective of preventing the government's misuse of customer call records. When such concerns
20 exist, the only proper remedy, consistent with the First Amendment, is to impose restrictions on
21 the government, not on the speaker's right to communicate.

22 a. Strict Scrutiny Applies

23 Applying § 2702(a)(3) to prohibit the speech alleged in the Complaint would trigger strict
24 scrutiny. ECPA operates as a "naked prohibition" of "pure speech," *Bartnicki*, 532 U.S. at 526,
25 and, if applied to the conduct alleged, would prohibit speech that is entitled to the highest level of
26 constitutional protection. Strict scrutiny applies whenever laws are applied to restrict political
27 speech or speech on issues of public concern. *See In re Primus*, 436 U.S. 412, 424-25 (1978)
28 (restriction on solicitation by attorneys is usually subject to intermediate scrutiny but is subject to

1 strict scrutiny when applied to solicitation of clients for civil rights cases, which involves core
2 political speech).

3 Speech is “political” if it is designed to influence the actions of the government. *Stromberg*
4 *v. California*, 283 U.S. 359, 369 (1931); *see also Mills v. Alabama*, 384 U.S. 214, 218-219 (1966)
5 (“major purpose” of First Amendment is to protect discussion of “government affairs,” including
6 “the manner in which government is operated or should be operated”). Such speech is political
7 whether it is addressed to the public in an effort indirectly to influence the government or is
8 spoken directly to the government.

9 Speech involves a matter of public concern when it transcends a purely personal interest of
10 the speaker, *Connick v. Myers*, 461 U.S. 138, 148 & n.8 (1983), and addresses a matter in which
11 the public at large has a stake, *see Cox Broad. Corp. v. Cohn*, 420 U.S. 469, 492 (1975) (speech
12 about the commission of a crime is of public concern). The societal importance of encouraging
13 speech about threats to public peace is the basis for the common law privilege for providing
14 information relating to public safety as well as a fundamental part of our constitutional structure.
15 *See supra* Section IV.B.2; *see also* Restatement (Second) of Torts § 598 & cmts. d & e.
16 Communications that are of such great public importance that they are privileged at common law
17 are by definition of public concern. *See Connick*, 461 U.S. at 143 n.5 (noting that First
18 Amendment standard for determining if speech is of public concern is related to common law tort
19 standards).

20 Defendants’ communications as alleged in the Complaint are political speech and speech
21 on matters of public concern under these standards. The Complaint alleges that defendants
22 provided call record information to help the government’s efforts to detect terrorist activity and
23 that they were in fact used for that purpose. As such, the speech would be “political” because it
24 would be designed to influence government action, and would be of “public concern” because it
25 would involve matters that are of great societal importance.

26 Strict scrutiny applies for a second, independent reason as well: applying ECPA to prohibit
27 communication of call records would be content-based. *See Republican Party of Minn. v. White*,
28 536 U.S. 765, 774-75 (2002) (strict scrutiny applies to content-based restrictions). “[W]hether a

1 statute is content neutral or content based is something that can be determined on the face of it; if
2 the statute describes speech by content then it is content based.” *Ctr. for Fair Public Policy v.*
3 *Maricopa County*, 336 F.3d 1153, 1164 (9th Cir. 2003) (citation omitted). The only
4 communications prohibited by ECPA are those that disclose information *about customers*. The
5 applicability of ECPA’s prohibition therefore depends entirely on the *content* of the
6 communication. In addition, ECPA’s content-based exceptions, *see* 18 U.S.C. § 2702(c)(5)
7 (permitting carrier to disclose records relating to child pornography), demonstrate that the
8 remaining prohibitions are likewise content-based; the permitted communications involve the same
9 potential harms—invasion of customer privacy without legal process and the risk of government
10 misuse—as do those prohibited. *See Hill v. Colorado*, 530 U.S. 703, 723 (2000) (restriction of
11 certain categories of speech and not others is problematic “if there is a significant number of
12 communications, raising the same problem that the statute was enacted to solve, that fall outside
13 the statute’s scope, while others fall inside”); *Foti v. City of Menlo Park*, 146 F.3d 629, 636 (9th
14 Cir. 1998) (“[W]hen ‘exceptions to the restriction on noncommercial speech are based on content,
15 the restriction itself is based on content.’” (citation omitted)).

16 Finally, the communications alleged do not fall into any of the three categories to which the
17 Supreme Court has applied intermediate scrutiny. The speech alleged in the Complaint does not
18 propose a commercial transaction and hence is not “commercial” speech. *See Rubin v. Coors*
19 *Brewing Co.*, 514 U.S. 476, 482 (1995). As a “naked prohibition against disclosures,” ECPA
20 directly targets speech and therefore is “a regulation of pure speech,” and “not a regulation of
21 conduct” under *United States v. O’Brien*, 391 U.S. 367 (1968). *See Bartnicki*, 532 U.S. at 526-27.
22 Finally, where it applies, ECPA does not limit the time, place, and manner of carriers’ speech, *see*
23 *United States v. Grace*, 461 U.S. 171, 177 (1983), but prohibits such speech entirely. Accordingly,
24 strict scrutiny is the appropriate standard.

25 b. Prohibiting the Speech Alleged Fails Strict Scrutiny

26 To survive strict scrutiny, a speech restriction must be justified by a compelling interest
27 and must be the least restrictive means of serving that interest. *White*, 536 U.S. at 775. ECPA, as
28 plaintiffs seek to apply it in this case, fails both these elements.

1 (1) No Compelling Interest Exists That Would Justify
2 Prohibiting The Speech Alleged

3 “[T]he Government may not generally restrict individuals from disclosing information that
4 lawfully comes into their hands in the absence of a ‘state interest of the highest order.’” *United*
5 *States v. Aguilar*, 515 U.S. 593, 605 (1995) (citation omitted). No such compelling interest would
6 justify applying ECPA to the alleged communication of call information to the government in
7 response to the government’s request for assistance in protecting the nation from terrorist attack.

8 The interest in protecting customers’ privacy is not sufficiently compelling to justify
9 suppressing speech in the circumstances alleged. *Bartnicki* is again dispositive. In *Bartnicki*, the
10 plaintiff sought damages for defendants’ disclosure of a tape recording of the content of a call.
11 Although the call was illegally intercepted, defendants did not participate in the interception. 532
12 U.S. at 525. The disclosure of the tape recording implicated a matter of public concern because
13 the recorded conversation involved a pending labor negotiation. *Id.* The Court held that, under
14 these facts, the First Amendment barred the imposition of liability.

15 The Court found that the government had failed to demonstrate any sufficiently compelling
16 interest. First, the Court rejected the government’s assertion that the prohibition was justified as a
17 means of removing the incentive for illegal interception. “The normal method of deterring
18 unlawful conduct is to impose an appropriate punishment on the person who engages in it [i.e., the
19 person who illegally intercepts the call] But it would be quite remarkable to hold that speech
20 by a law-abiding possessor of information can be suppressed in order to deter conduct by a non-
21 law-abiding third party.” *Id.* at 529-30. Second, the Court found that the government’s interest in
22 protecting the privacy of communications did not justify imposing “sanctions on the publication of
23 truthful information of public concern” because “privacy concerns give way when balanced
24 against the interest in publishing matters of public importance.” *Id.* at 534.

25 *Bartnicki* followed a long line of cases holding that the government’s interest in protecting
26 privacy cannot justify prohibiting the press from reporting the identity of persons involved in law
27 enforcement proceedings. For example, *Florida Star v. B.J.F.*, 491 U.S. 529, 537 (1989), held that
28 the state’s interest in protecting the privacy of the victim was insufficient to justify prohibiting the

1 publication of her name, because speech about “the commission, and investigation, of a violent
2 crime which had been reported to authorities” is “of paramount public import.” *See also Cox*
3 *Broad.*, 420 U.S. at 491 (state’s interest in protecting privacy of victim’s family insufficient to
4 justify prohibiting truthful report of victim’s name obtained from court records); *Smith v. Daily*
5 *Mail Publ’g Co.*, 443 U.S. 97, 104 (1979) (juvenile defendant’s privacy interest insufficient to
6 justify prohibiting publication of his name). These cases establish that privacy interests cannot
7 trump the right to speak on matters of public concern.

8 Under these cases, the privacy interests asserted in this case cannot justify prohibiting
9 alleged communications to the government to help protect the nation from terrorist attack. Indeed,
10 the privacy interests in this case are far weaker than those addressed in prior cases.

11 First, information about what numbers a customer dials is far less private than call content.
12 Because the customer voluntarily conveys phone numbers to the telephone company, no Fourth
13 Amendment privacy interest is implicated if the company were to communicate those records to
14 the government: “a person has no legitimate expectation of privacy in information he voluntarily
15 turns over to third parties.” *Smith v. Maryland*, 442 U.S. 735, 743-44 (1979). As explained in an
16 earlier case involving AT&T’s voluntary provision of call records to the government:

17 In any normal life, even in pursuing his most private purposes, the individual must
18 occasionally transact business with other people. When he does so, he leaves behind, as
19 evidence of his activity, the records and recollections of others. He cannot expect that
20 these activities are his private affair. To the extent an individual knowingly exposes his
21 activities to third parties, he surrenders Fourth Amendment protections, and, if the
22 Government is subsequently called upon to investigate his activities for possible
23 violations of the law, it is free to seek out these third parties, to inspect their records, and
24 to probe their recollections for evidence [9] In a sense, then, the Fourth
25 Amendment carries with it both a promise and a warning. It promises each individual
26 that there is a zone in which he may conduct his affairs in private, shielded from
27 unwarranted investigative scrutiny, and yet it warns each individual that, once he projects
28 his activities beyond this private enclave, the Government is free to scrutinize them for
law enforcement purpose.

24 *Reporters Committee v. AT&T*, 593 F.2d 1030, 1043 (D.C. Cir. 1978) (emphases and footnote
25 omitted).

26 *Bartnicki* holds that even a privacy interest protected by the Fourth Amendment (the
27 privacy of call contents) is insufficiently compelling to justify abridgment of the First Amendment
28 right to speak on a matter of public concern. Because the privacy interest in information about

1 what numbers a customer dialed is far weaker—indeed, not even protected by the Fourth
2 Amendment—it cannot justify suppressing speech about similarly important matters.

3 Second, the information that defendants allegedly communicated to the government was
4 lawfully acquired in the ordinary course of business. Even an illegal act in the creation of
5 information that is subsequently disclosed by a lawful recipient is not sufficient “to remove the
6 First Amendment shield from speech about a matter of public concern.” *Bartnicki*, 532 U.S. at
7 535. This case is even clearer: the information allegedly communicated was acquired by
8 defendants lawfully and as part of their business.

9 Third, defendants’ alleged communications *to the government* implicate privacy to a far
10 lesser extent than does disclosure *to the public* through mass media, as occurred in *Bartnicki*,
11 *Florida Star*, and similar cases. “[T]he individual interest in protecting the privacy of the
12 information sought by the government is significantly less important where the information is
13 collected by the government but not disseminated publicly.” *Am. Fed’n of Gov’t Employees v.*
14 *HUD*, 118 F.3d 786, 793 (D.C. Cir. 1997). The Complaint does not allege that information about
15 the plaintiffs’ calls was divulged by NSA to anyone else in the government, let alone to the public.
16 If a government records program exists, it is classified, and disclosure of information compiled in
17 such a program would be stringently restricted. ECPA, moreover, prohibits a government
18 employee from willfully disclosing a record for improper purposes. 18 U.S.C. § 2707(g).

19 Fourth, whereas in *Bartnicki* a private conversation was actually made known to a broad
20 audience through a radio broadcast, plaintiffs allege that record information was included in a
21 database that was selectively accessed through a computer search. The Complaint does not allege
22 that a human being examined any of the records pertaining to the plaintiffs. An individual whose
23 records are contained in a database but never examined by a human being does not suffer the
24 dignitary harm of another person learning a private fact about that individual, nor an impingement
25 on any action that the individual may wish to take, nor any adverse effect on the individual’s
26 employment or reputation. As the Tenth Circuit stated when it invalidated, under the less stringent
27 intermediate scrutiny standard, an FCC rule restricting telephone carriers from using call records to
28 identify customers to whom they would market additional services:

1 In the context of a speech restriction imposed to protect privacy by keeping certain
2 information confidential, the government must show that the dissemination of the
3 information desired to be kept private would inflict *specific and significant harm on*
4 *individuals*, such as undue embarrassment or ridicule, intimidation or harassment, or
5 misappropriation of sensitive personal information for the purposes of assuming
6 another's identity A general level of discomfort from knowing that people can
7 readily access information about us does not necessarily rise to the level of a substantial
8 state interest

9 *U.S. West, Inc. v. FCC*, 182 F.3d 1224, 1235 (10th Cir. 1999) (emphasis added). Absent human
10 apprehension of an individual's call records, the harm to privacy is *de minimis*.

11 Fifth, ECPA's underinclusiveness defeats any claim that the government's interest in
12 prohibiting disclosure of call records is compelling. ECPA prohibits disclosures of records only to
13 the government, not "to any person other than a governmental entity." 18 U.S.C. §§ 2702(a)(3),
14 2702(c)(6). In addition, ECPA permits carriers voluntarily to disclose customer records to the
15 government in connection with a report of a violation of law relating to child pornography. *Id.*
16 § 2702(c)(5). Disclosures to private third parties, and to the government in connection with child
17 pornography, implicate privacy interests at least as much as the communication of records to the
18 government for inclusion in a database. Any claim that the latter restriction is justified by a
19 compelling interest in protecting privacy is defeated by the former exceptions. *See Florida Star*,
20 491 U.S. at 540 ("facial underinclusiveness" of statute "raises serious doubts" about whether
21 statute serves claimed privacy interests); *Daily Mail*, 443 U.S. at 104-05 (statute prohibiting
22 publication in electronic media of the name of a juvenile defendant, but permitting publication in
23 newspapers, does not accomplish stated purpose of protecting anonymity).

24 More broadly, the government's ability to compel production of call records under ECPA
25 undermines any claim that the statute is justified by a compelling need to protect privacy, at least
26 as applied to records allegedly relevant to a counter-terrorism program. ECPA permits federal or
27 state government agencies to compel the production of call records simply by issuing an
28 administrative subpoena, without judicial intervention. 18 U.S.C. § 2703(c)(2). ECPA thus
reflects Congress's judgment that any privacy interests in call records are trumped when such
information is relevant to a mere administrative function; *a fortiori*, the privacy interest is not
sufficiently compelling to justify suppressing defendants' *right to speak*, where the information

1 allegedly communicated is relevant to the government's effort to prevent future terrorist attacks.

2 As noted, the Complaint alleges that the call records were in fact used for such purposes.

3 Any asserted interest in protecting customers from government misconduct also is
4 insufficient. The government cannot prohibit speech to deter *another party* from breaking the law.
5 *See Bartnicki*, 532 U.S. at 529-30 (“[I]t would be quite remarkable to hold that speech by a law-
6 abiding possessor of information can be suppressed in order to deter conduct by a non-law-abiding
7 third party.”). In addition, the Complaint does not allege that the government collected records in
8 bad faith or that the information was unrelated to a legitimate purpose. Rather, plaintiffs allege
9 that the records purportedly provided were in fact used for the purpose of tracking down terrorism
10 suspects.

11 (2) Prohibiting The Speech Alleged Is Not The Least Restrictive
12 Means

13 Prohibiting speech is not the least restrictive means of advancing any governmental interest
14 in protecting privacy. Instead, that interest can be served by restricting the government's use and
15 handling of such information. The government often receives sensitive information about people
16 that could cause harm if disclosed to the public or used for an improper purpose. The traditional
17 means of mitigating these risks, consistent with the First Amendment, is not to prohibit private
18 citizens from divulging such information to the government, but to restrict the government's use
19 and disclosure of such information. *See e.g.*, 26 U.S.C. § 6103 (prohibiting disclosure of tax return
20 information); 42 U.S.C. § 14135e (barring unauthorized use of DNA information); Fed. R. Crim.
21 P. 6(e)(2)(B)(vi) (barring disclosure of matters occurring before a grand jury).

22 c. Prohibiting Speech As Alleged In The Complaint Fails Intermediate
23 Scrutiny

24 Applying ECPA to the speech alleged in the Complaint triggers strict scrutiny. Even under
25 intermediate scrutiny, however, applying ECPA's prohibition to defendants' alleged
26 communications would be invalid. Intermediate scrutiny gives the government some latitude to
27 regulate when, where, and how speech can be delivered, provided it “leave[s] open ample
28 alternative channels of communication.” *Grace*, 461 U.S. at 177 (citation omitted); *see also*
Central Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n of New York, 447 U.S. 557, 566 n.9

1 (1980). It does not permit the government to prohibit speech altogether. Where it applies, ECPA
2 entirely bans carriers from communicating to the government information about what calls
3 customers make. Allowing speech only when the government—in its sole discretion—compels it
4 is not an “alternative channel” for voluntary speech, but an impermissible prior restraint. *See, e.g.,*
5 *City of Lakewood*, 486 U.S. at 757. For this reason alone, ECPA would be invalid under
6 intermediate scrutiny if applied to the speech alleged in the Complaint.

7 In addition, to pass muster under intermediate scrutiny, a restriction must further a
8 substantial or important interest, and the restriction on speech must be no greater than is essential
9 to further that interest. *O’Brien*, 391 U.S. at 377. First, for the same reasons as discussed in the
10 strict scrutiny analysis, the interests in protecting privacy and preventing government misconduct
11 are not substantial. As noted, the Tenth Circuit held that a restriction on the use of call records
12 violated intermediate scrutiny. *U.S. West*, 182 F.3d at 1237-38. After expressing “doubts” about
13 whether the government’s interest in preventing the disclosure of call records was substantial, *id.*
14 at 1235, the court found that the government failed to demonstrate that the harm to privacy was
15 “real” because there was no evidence of who would receive customers’ private information. *Id.* at
16 1237-38. Likewise, as to customers whose records were allegedly made available to the
17 government but not examined by a human being, and who suffered no tangible harm, the interest
18 in protecting privacy would not be substantial and a prohibition on such communications would
19 not directly advance any such interest. Nor would prohibiting this alleged speech directly advance
20 a substantial interest in preventing government misconduct, absent evidence that the government
21 improperly disseminated the information or used it for an improper purpose.

22 Second, the substantially underinclusive nature of ECPA’s prohibition, as discussed
23 previously, renders application of the prohibition to defendants’ alleged speech invalid. A
24 prohibition on speech “pierced by exemptions and inconsistencies” fails intermediate scrutiny.
25 *Greater New Orleans Broad. Ass’n, Inc. v. United States*, 527 U.S. 173, 190 (1999).

26 Third, the prohibition on speech is not narrowly tailored to protecting privacy and
27 preventing government misconduct. As noted, these interests can be addressed by imposing
28 restrictions on the government’s use of call records, without depriving providers of their right to

1 speak. Under intermediate scrutiny, “if the Government could achieve its interests in a manner
2 that does not restrict speech, or that restricts less speech, the Government must do so.” *Thomson v.*
3 *Western States Med. Center*, 535 U.S. 357, 371 (2002).

4 d. The Complaint Must Be Dismissed Because It Seeks To Impose
5 Liability On Protected Speech

6 The Complaint alleges that defendants provided call information to help the government
7 prevent further attacks by al Qaeda, and that the government actually used the information for this
8 purpose. Taking these allegations as true, defendants’ alleged speech is protected from liability.

9 But the Speech Clause safeguards not only speech that turns out to be relevant to protecting
10 the nation, but also speech that an objectively reasonable person would have believed could be
11 relevant. Like the Petition Clause, the Free Speech Clause establishes a zone of protection to
12 preserve the “breathing room” necessary to safeguard First Amendment freedoms and to prevent
13 “chilling” of valuable speech. *See, e.g., Hustler Magazine, Inc. v. Falwell*, 485 U.S. 46, 52 (1988);
14 *New York Times v. Sullivan*, 376 U.S. 254, 271-72 (1964).

15 To protect this “breathing room,” the First Amendment bars a regime of strict liability in
16 which the speaker is punished if, after the fact, it is determined that its speech was not protected.
17 At least if there were an objectively reasonable basis for believing that the speech was protected,
18 the government may not punish the speaker. *See, e.g., Gertz v. Robert Welch, Inc.*, 418 U.S. 323,
19 347 & n.10 (1974) (requiring plaintiff to demonstrate at least negligence in order to hold defendant
20 liable for speaking). Hence, a provider is constitutionally protected either if the information were
21 *in fact* relevant to protecting the public, or if there were an objectively reasonable basis for
22 believing that it was. In these circumstances, a speaker cannot be held liable, regardless of the
23 speaker’s subjective intent. *Hustler*, 485 U.S. at 53 (“even when a speaker or writer is motivated
24 by hatred or ill will his expression [is] protected by the First Amendment”).

25 Plaintiffs have not and cannot meet their burden of demonstrating that defendants’ alleged
26 speech was not protected. Not only do they allege that defendants’ purported communications
27 were in fact relevant to the government’s effort to protect the nation, but they also allege facts
28 establishing that any objectively reasonable person would have concluded that the information was

1 relevant in this way. The dispositive allegation is that defendants' alleged assistance was not
2 unprompted, but rather was provided in direct response to the government's *request*. Compl. ¶¶ 9,
3 148, 166, 257, 259. The law has always insisted that, when authorities ask for specific assistance
4 in an emergency, it is objectively reasonable for citizens to rely on the government's judgment as
5 to need. As the Restatement explains in discussing the privilege afforded to private parties who
6 respond to a call for help from the police:

7 The officer's need for assistance often arises in a sudden emergency and the assistance
8 must be given at once to be effective. To require a person whom a peace officer calls
9 upon to assist in making an arrest to take the risk of being liable in the event that the
10 officer is not himself privileged to make it, unless such person exercises such judgment
11 and makes such investigations as he would be required to make were he acting on his
12 own initiative, would seriously deter such persons from giving the prompt aid necessary
13 to effect arrests which, save in an insignificant minority of cases, the officer is privileged
14 to make. Therefore, the actor is privileged to rely upon the officer's request and assist
15 him unless the facts are such that the actor knows or is convinced beyond a reasonable
16 doubt that the officer is not himself privileged to make the arrests.

17 Restatement (Second) of Torts § 139, cmt. d. The person providing assistance, moreover, need not
18 second-guess the officer's stated need for assistance. "It is for the peace officer and not the actor
19 to determine the necessity for assistance." *Id.*, cmt. e. As in other areas, a "presumption of
20 legitimacy" is afforded to official conduct. *Nat'l Archives & Records Admin. v. Favish*, 541 U.S.
21 157, 174 (2004); *see also Hartman v. Moore*, 547 U.S. 250, 126 S.Ct. 1695, 1705-06 (2006)
22 (presumption that prosecutor has legitimate grounds for taking action). These principles are
23 especially salient in the national security context, where (1) information concerning the degree of
24 threat and the potential utility of the information sought are peculiarly within the government's
25 control, and (2) the government's ability to explain why it is seeking help is necessarily limited.

26 Because the First Amendment requires plaintiffs to allege that defendants lacked an
27 objectively reasonable basis to believe that their alleged speech related to a matter of public
28 concern, and because the Complaint fails to do so, it must be dismissed.

4. Under *Ashwander*, ECPA Must Be Construed To Permit Defendants'
Alleged Speech and Petitioning Activity

Ashwander requires a court to adopt a "fairly possible" construction of a statute that will
avoid the need to address a serious constitutional question. *St. Cyr*, 533 U.S. at 299-300. To
determine if a narrowing construction is required, a court need not decide "whether the First

1 Amendment *does* protect [defendants’ activity], or even whether it probably does. Rather “[it
2 must] make a narrow inquiry whether [granting plaintiff’s requested relief] presents a significant
3 risk that the First Amendment will be infringed.” *Overstreet v. United Bhd. of Carpenters &*
4 *Joiners of Am.*, 409 F.3d 1199, 1210 (9th Cir. 2005) (citation omitted). If so, a court must construe
5 the statute as not prohibiting the speech or petitioning activity in question, unless such a
6 construction is “foreclosed.” *Edward J. DeBartolo Corp. v. Florida Gulf Coast Bldg. & Constr.*
7 *Trades Council*, 485 U.S. 568, 588 (1988) (rejecting agency’s construction of statute because, as
8 applied, it raised serious First Amendment questions).

9 The Ninth Circuit applied these principles in *Sosa*, concluding that “the *Noerr-Pennington*
10 doctrine stands for a generic rule of statutory construction, applicable to any statutory
11 interpretation that could implicate the rights protected by the Petition Clause. Under the *Noerr-*
12 *Pennington* rule of statutory construction, *we must construe federal statutes so as to avoid*
13 *burdening conduct that implicates the protections afforded by the Petition Clause unless the*
14 *statute clearly provides otherwise.*” 437 F.3d at 931 (emphasis added, citations omitted). The
15 court described this rule as a “specific application” of the *Ashwander* principle. *Id.* at n.5.

16 *Sosa* applied these principles to affirm the dismissal of a RICO claim based on pre-suit
17 demand letters. The court found that pre-suit demand letters are within the “breathing space
18 required for the effective exercise of” the right to petition the courts, *id.* at 933, in that they are
19 “incidental” or “intimately related” to petitioning activities, *id.* at 934. Because restricting such
20 communications “could impair the right of access to the courts protected by the First
21 Amendment,” *id.* at 936, the court found that RICO must be construed, if possible, to avoid the
22 constitutional issue that would arise from imposing liability for engaging in such communications.
23 The statutes at issue did not “clearly” or “directly” address presuit demand letters, *id.* at 939, 941,
24 nor did they “unambiguously” or “unavoidably” require the imposition of liability for such
25 communications, *id.* at 940. Because the statutes could be “construed to avoid burdening” such
26 communications, *id.* at 941, under the *Noerr-Pennington* doctrine they had to be so interpreted, *id.*

27 Accordingly, ECPA must be construed as not prohibiting the communications alleged, as
28 long as such an interpretation is possible and not clearly and unambiguously foreclosed. ECPA is

1 plainly susceptible to such a narrowing construction.

2 First, the Court can—and therefore must—construe the term “divulge” in § 2702(a)(3) as
3 not prohibiting the alleged provision of access to records in a database, in the absence of an
4 allegation that the information was actually made known to a person in the government.

5 Second, the Court can—and therefore must—construe ECPA as not restricting the alleged
6 collection of records for military intelligence purposes as alleged in the Complaint.

7 Third, the Court can—and therefore must—also construe ECPA’s emergency exception as
8 authorizing the communications alleged. That section authorizes a carrier voluntarily to divulge
9 records to the government “if the provider, in good faith, believes that an emergency involving
10 danger of death or serious physical injury to any person requires disclosure without delay of
11 information relating to the emergency.” 18 U.S.C. § 2702(c)(4). As noted, the political branches
12 had determined that acts of terrorism “continue to pose an unusual and extraordinary threat to the
13 national security,” 115 Stat. 224, and that a “national emergency exists” by reason of the 9/11
14 attacks and “the continuing and immediate threat of further attacks on the United States,” 50
15 U.S.C. § 1621 note. These determinations provide an objectively reasonable basis, as a matter of
16 law, for believing that the information allegedly requested was relevant to the government’s effort
17 to protect the nation.

18 Finally, the Court can—and therefore must—interpret ECPA’s “rights or property”
19 exception as authorizing the communications alleged. While the emergency exception applies
20 when anyone is in danger, the right to act goes further when the company itself is at serious risk,
21 becoming a matter of self-protection. In these cases, ECPA permits the divulgence of a record for
22 “the protection of the rights or property of the provider.” 18 U.S.C. § 2702(c)(3). Verizon had
23 already suffered massive losses in 9/11, including the destruction of property adjacent to the World
24 Trade Center valued at \$1.25 billion. Verizon remained at especially high risk of terrorist attack,
25 both because its facilities are part of the critical national communications infrastructure and thus a
26 target in its own right, and also because, as the events of 9/11 showed, Verizon’s facilities are
27 embedded in key financial and government facilities that themselves were likely targets of further
28 attacks. *See* Critical Infrastructure Protection Act, codified at 42 U.S.C. § 5195c; National

1 Strategy for the Physical Protection of Critical Infrastructures and Key Assets, issued by the White
2 House in February 2003, p. 48; Testimony of Robert S. Mueller III, Director, FBI, Before Senate
3 Select Committee on Intelligence (Feb. 11, 2003) (“Mueller Testimony”). Verizon faced not only
4 the risk of physical destruction of its property, but also of the compromise of its network through
5 cyber attack. *See* Mueller Testimony. The President formally recognized that al Qaeda had the
6 capability and intention to launch further attacks that would “cause massive destruction of
7 property.” Military Order of Nov. 13, 2001, § 1(a), 66 Fed. Reg. 57833, 57833. To mitigate these
8 risks, the President issued Executive Order No. 13231, 66 Fed. Reg. 53063 (Oct. 16, 2001), calling
9 on government and the private sector to coordinate efforts to protect critical information
10 infrastructure, including the physical assets that support telecommunications.

11 The danger to property in these circumstances was not just its destruction, but also that al
12 Qaeda would use telecommunications facilities as its own command-and-control network to plan
13 and execute attacks on the country. When the country is facing foreign attack, citizens have a duty
14 “according to [their] capacity, to support and defend government against all enemies.” *Hamilton*
15 *v. Regents*, 293 U.S. 245, 262-63 (1934). Hence, citizens must avoid taking any action that could
16 furnish resources to the enemy, and all commercial activity with the enemy is therefore prohibited.
17 *Sutherland v. Mayer*, 271 U.S. 272, 286-87 (1926). This duty applies even more strongly when
18 private property can be used by the enemy as a weapon against the country. In these
19 circumstances, the government has the authority to destroy private property to prevent it from
20 falling into enemy hands. *See United States v. Caltex (Philippines), Inc.*, 344 U.S. 149, 155 (1952)
21 (private property that was “a potential weapon of great significance to the invader” could be
22 destroyed by the government). It follows that the government has the lesser power to ask or
23 require a property owner to take steps to prevent the use of its property as a weapon by the enemy.
24 Complying with NSA’s alleged request for access to databases to identify terrorists and prevent
25 their use of the telecommunications network to plan and carry out further attacks, as alleged in the
26 Complaint, would, if true, certainly fall within this traditional property right.

27 Construing ECPA to permit the communications alleged is at least possible. The statute
28 does not clearly and unambiguously foreclose those interpretations, which must therefore be

1 adopted to avoid the serious constitutional problem that would otherwise arise. *See Edward J.*
2 *DeBartolo*, 485 U.S. at 588; *Sosa*, 437 F.3d at 940-42.

3 **V. THE REMAINING CLAIMS MUST BE DISMISSED**

4 **A. Claim 4, Under 47 U.S.C. § 605, Must Be Dismissed**

5 The Fourth Claim, under 47 U.S.C. § 605, must be dismissed to the extent it relates to
6 alleged content interception. As discussed above, § 605 does not apply to the President's
7 interception of calls for foreign intelligence purposes. *United States v. Butenko*, 494 F.2d 593, 601
8 (3d Cir. 1974) (en banc) ("In the absence of any indication that the legislators considered the
9 possible effect of § 605 in the foreign affairs field, we should not lightly ascribe to Congress an
10 intent that § 605 should reach electronic surveillance conducted by the President in furtherance of
11 his foreign affairs responsibilities."); *see also United States v. Stone*, 305 F. Supp. 75, 80-82
12 (D.D.C. 1969) (same). Those holdings reflect an established rule, based on separation-of-powers
13 principles, that statutes should not be construed to apply to the President's constitutional powers
14 absent a clear statement, as discussed more fully above in connection with ECPA's records
15 provisions. In addition, to the extent the Complaint implies that the alleged divulgence of call
16 records violated § 605, this claim too fails. "[T]elephone toll records . . . do not fall within the
17 scope of [§ 605]." *United States v. Barnard*, 490 F.2d 907, 913 (9th Cir. 1973) (citation omitted).

18 **B. Claim 1, Under 18 U.S.C. § 2702(a)(1) and (a)(2), Must Be Dismissed**

19 As noted, ECPA, including § 2702(a), does not prohibit carriers from voluntarily providing
20 information for national intelligence purposes. In addition, in light of plaintiffs' dismissal of the
21 Verizon entities that provide Internet and e-mail services, the claim based on alleged disclosure of
22 stored content is inapplicable to the remaining defendants and should be dismissed.

23 **C. The State-Law Claims Must Be Dismissed**

24 The state claims based on the alleged divulgence of records are preempted by ECPA,
25 which states that "[n]o cause of action shall lie in any court" against a provider who provides
26 information or assistance "in accordance with the terms of a statutory authorization." 18 U.S.C.
27 § 2703(e). If defendants divulged records to NSA as alleged, such divulgence would have been
28 statutorily authorized by the "emergency" and "rights and property" exceptions. In addition, as

1 discussed in defendants' motion to dismiss the complaints in *Riordan, Bready, and Chulsky*, state
2 law cannot be applied to the activities alleged, which arise in a field that the Constitution entrusts
3 solely to the federal government. If the Court grants that motion, defendants will, if necessary,
4 seek the dismissal of the state-law claims in the Master Complaint on this ground.

5 In addition, two issues specific to the state-law claims pled in Master Complaint warrant
6 special comment. First, Claims 8 and 9—alleging deception and breach of contract based on the
7 purported violation of Verizon's privacy policy—must be dismissed as to defendant MCI.

8 Plaintiffs do not cite any MCI privacy policies or allege that MCI ever promised not to disclose
9 call information to the government. Plaintiffs acknowledge that Claims 8 and 9 are based solely
10 on alleged representations *by Verizon*. Compl. ¶ 181. The MCI plaintiff's claim against Verizon
11 for alleged "representations" made by Verizon after the merger on January 6, 2006 (*see id.* ¶ 10),
12 must likewise be dismissed. The only plaintiff who was an MCI customer, Elaine Spielfogel-
13 Landis ("Landis"), alleges that she has been a customer since 2001 and hence remains subject to
14 her MCI contract. *Id.* ¶ 8. She does not allege entering into a new service agreement with
15 Verizon, modifying her service agreement with MCI, or relying on any privacy policy of
16 Verizon's. Thus, Landis's allegations fail to state a claim against Verizon.

17 Second, Claims 8 and 9 must be dismissed against Verizon because the privacy policies
18 cited by plaintiffs would expressly allow the disclosures alleged. In those policies, Verizon
19 expressly reserves the right to disclose information on its own initiative "to protect the safety of
20 customers, employees or property." *Id.* ¶ 180.¹⁴ This is broad language, and plaintiffs' own
21 allegations establish that the alleged disclosures by Verizon fall well within its ambit. Plaintiffs
22 have alleged that—after both Congress and the President had declared that the country faced an
23 "extraordinary" and "immediate threat of further attacks"—Verizon disclosed information for the
24 "purpose of assisting the government" to prevent such further attacks. *Id.* ¶ 259. These allegations
25 demonstrate that the alleged disclosures of customer records by Verizon were to protect the safety

26 ¹⁴ The policy cited in ¶ 179 contains the same language, although the Complaint does not quote it.
27 The Court may consider the full text of that document, which is attached as Exhibit 1 to the
28 concurrently-filed Request for Judicial Notice, because it was referenced in the complaint. *See*
Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005).

1 of Americans and their property—a purpose that brings Verizon squarely within the terms of its
2 privacy policies. While the nexus between the alleged disclosures and public safety is established
3 by Verizon’s alleged purpose alone, plaintiffs’ allegations regarding the manner of disclosure
4 reinforce that nexus. The Complaint describes a minimization process in which information is
5 purportedly made known to NSA personnel selectively by an automated winnowing process that
6 identifies those records that are linked to suspected terrorists. *Id.* ¶ 166. If the program plaintiffs
7 allege existed, the plain terms of Verizon’s policies encompass such disclosures.

8 Third, the breach of contract claim must be dismissed because plaintiffs have not identified
9 any contracts that Verizon allegedly breached. The Complaint does not allege that the privacy
10 policies, which are quoted, were incorporated into any contracts with Verizon. Indeed, although
11 the FCC requires carriers to enter into written contracts with customers, *see* 47 C.F.R. § 61.19(c),
12 plaintiffs fail to reference the contract or describe its terms. Absent such allegations, the claim for
13 breach of contract based on a claimed breach of a privacy policy through the alleged disclosure of
14 information to the government for counter-terrorism purposes must fail. *See Dyer v. Northwest*
15 *Airlines Corp.*, 334 F. Supp. 2d 1196, 1199-1200 (D.N.D. 2004) (rejecting similar claim).

16 VI. CLAIMS AGAINST MCI ARE BARRED BY THE BANKRUPTCY DISCHARGE

17 Plaintiff Landis alleges that MCI established a system to provide NSA access to its call
18 content and records shortly after 9/11. This alleged course of conduct, according to plaintiff’s
19 theory, began prior to July 21, 2002—the date on which MCI and its affiliate debtors filed a
20 Chapter 11 bankruptcy petition. *See* Compl. ¶¶ 149, 169-70; *see also In re WorldCom, Inc.*,
21 No. 02-13533 Docket No. 1 (Bankr. S.D.N.Y. July 21, 2002).

22 The Bankruptcy Court’s Order confirming the plan of reorganization (the “Plan”) states
23 that persons holding pre-discharge claims against WorldCom and its affiliate debtors “shall be
24 forever precluded and enjoined, pursuant to § 524 of the Bankruptcy Code, from prosecuting or
25 asserting any such discharged Claim against . . . the Debtors.” *In re WorldCom*, No. 02-13533
26 Docket No. 9686 (Oct. 31, 2003) ¶ 17. Those asserting pre-discharge claims against MCI, as an
27 affiliate debtor, are barred from recovering against MCI and its successor in interest, Verizon, in
28 this Court. Strict compliance with the Bankruptcy Court’s injunction ensures that all creditors of

1 MCI will be treated equally. It is for the Bankruptcy Court to evaluate under the Bankruptcy Code
2 any “claim” (or “right to payment”) that the plaintiffs in this action may have. 11 U.S.C. § 101(5).
3 Landis is required to seek leave to file a proof of claim in Bankruptcy Court, which will then
4 determine whether the claim should be “allowed” and, if so, in what amount.

5 The Bankruptcy Code’s definition of “claim” is broad, and it includes any claim Landis
6 may assert in this lawsuit. A claim is defined as a “right to payment, whether or not such right is
7 reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed,
8 undisputed, legal, equitable, secured, or unsecured.” *Id.* § 101(5)(A). The Code’s broad definition
9 of “claim” “is designed to ensure that all legal obligations of the debtor, *no matter how remote or*
10 *contingent*, will be able to be dealt with in the bankruptcy case.” *Cal. Dep’t of Health Svcs. v.*
11 *Jensen (In re Jensen)*, 995 F.2d 925, 929-30 (9th Cir. 1993) (internal citations omitted); *see also*
12 *Hassanally v. Republic Bank (In re Hassanally)*, 208 B.R. 46, 53 (9th Cir. BAP 1997).

13 Courts have interpreted *Jensen* as requiring only that the creditor had a *prior relationship*
14 with the debtor before the bankruptcy; if so, then any claim arising out of the debtor’s pre-
15 discharge conduct would be deemed discharged: “[W]here debtor committed the act or omission
16 complained of prior to filing bankruptcy, and the claimant has a *relationship* to the act or omission
17 at the time, such as being the patient or a contracting party, the claim arose at that point in time
18 *even if there has been no indication or manifestation of the consequences of the act or omission.*”
19 *In re Russell*, 193 B.R. 568, 571 (Bankr. S.D. Cal. 1996) (emphasis added); *see also In re Emelity*,
20 251 B.R. 151, 156 (Bankr. S.D. Cal. 2000).

21 The Complaint alleges that Landis, the sole named MCI Plaintiff, has been a customer of
22 MCI since October 2001—well before the July 21, 2002 petition date. Compl. ¶ 8. Any claim she
23 could seek to assert arising out of MCI’s alleged decision in October 2001 to establish a system to
24 allow NSA access to customer contents and records was discharged in bankruptcy under the Plan.
25 *See Emelity*, 251 B.R. at 156; *Russell*, 193 B.R. at 572. Finally, any claim Landis could seek to
26 assert arose before discharge, even though she may claim injury that occurred after the discharge.
27 “The fact that the consequences of the wrongful conduct materialized at a later date does not
28 metamorphose the pre-existing conduct into future conduct, thereby endowing the results of the

1 wrongful conduct with an independent and unconnected quality.” *Hassanally* 208 B.R. at 54; *see*
2 *also In re WorldCom, Inc.*, 320 B.R. 772, 782-83 (Bankr. S.D.N.Y. 2005); *In re WorldCom, Inc.*,
3 328 B.R. 35, 57-58 (Bankr. S.D.N.Y. 2005). Likewise, claims based on alleged conduct that
4 started prepetition and continued postpetition are properly regarded as prepetition claims. *See*
5 *Advanced Computer Svcs. v. MAI Sys. Corp.*, 161 B.R. 771, 774-75 (E.D. Va. 1993); *see also In re*
6 *Mahurkar Double Lumen Hemodialysis Catheter Patent Litig.*, 140 B.R. 969, 971, 977 (N.D. Ill.
7 1992).

8 The claims based on MCI’s alleged conduct were discharged in the MCI bankruptcy, and
9 Landis is enjoined from bringing her claim against MCI in this lawsuit. Landis’s sole recourse is
10 to seek leave from the WorldCom Bankruptcy court to file a claim in that court.

11 CONCLUSION

12 For the foregoing reasons, the Complaint should be dismissed with prejudice. While the
13 reasons set forth in this brief and the government’s state-secrets submission are amply sufficient to
14 require dismissal, defendants respectfully suggest that, if the Court rules otherwise, it convene a
15 case management conference to establish an orderly sequence of briefing on other threshold legal
16 issues affecting the viability of all of the consolidated cases.
