If disposing of more than one kilogram of lead....

Lead Waste:

- Any quantity of lead waste disposed of as regulated waste
- The Contractor has submitted a site-specific emergency preparedness and response plan (EPRP)
- The EPRP includes provisions for spills/releases and fire
- Contractor personnel are familiar with hazards, the use of protective equipment and clothing procedures when handling waste containing lead
- Workers trained in lead safety
- All lead containing waste is appropriately packaged for the waste waste category. For example, corrosive waste is stored in non-metallic containers
- All liquid waste containing lead stored in leak-proof containers with secure lid
- Lead waste not mixed with any other solid or liquid for the purposes of dilution
- Sign posted in temporary lead-storage areas
- All lead waste stored so that other wastes will have no contact, even if there is a spill
- Persons transporting or handing dangerous goods have valid and current Transportation of Dangerous Goods (TDG) certification
- Contractor transporting lead waste has correct placard on vehicle
- Emergency response kit on transportation vehicle
- Lead waste disposed of or recycled by a licensed waste disposal facility
- Records
 - All inspections conducted on site
 - Copy of shipping documents for transportation of waste
 - Copy of disposal certificate from disposal facility
 - Copy of fire protection plan
