I was a juror on your case this week and I wanted to let you know some things we discussed. If you're interested I respect what you were doing and just so you know if you would have polled the jury I would have been the dissenting vote to give you another hung jury. I really hated having to give the verdict we did as did several of us, but according to the wording of the laws we were given I was outvoted & eventually out-fought. I think due to some lack of legal-ese knowledge if you appeal I hope you get some legal counsel to explain in detail some of these laws and your position.
