## INTRODUCTION TO THE PLAN STRATEGIES ROADMAP

## JOHN THOMASON

The following section of the plan contains a step by step roadmap for each of the strategies that we are recommending
You will notice that the strategies are often interdependent; that is, in order for one strategy to be successful, you must complete another strategy as well. It is the integration of each of these strategies that allows you to most efficiently accomplish your goals.

Also keep in mind that there is often more than one way to get from point A to point B. This is true in wealth transfer planning. If a particular strategy or combination of strategies is not acceptable to you, we may be able to reach the desired result in a less efficient but perhaps more acceptable way.

The following pages are a conceptual road map only. There are numerous details contained in each strategy that are not detailed in the overall plan that follows.

## BUSINESS PLANNING OPPORTUNITIES

## KEY EMPLOYEE

## JOHN THOMASON

Trucking Company has a key employee who is responsible for many of the supplier relationships.

Goal: Protect company from the death, disability or termination of key employee.

## Ideas

1) Diversify supplier relationships to one or more company employees
2) Train new employees to do job of key employee
3) Train suppliers to accept new employees
4) Create incentives for your key employee based on company reaching its goals
a. Cash bonus for reaching certain goals
b. Continued salary for management of new employees
5) Provide security for key employee throughout process
a. Pool of cash for retirement, subject to
i. Reaching company goals
ii. Vesting
6) Keep key employee from feeling threatened by the changes
a. Constant reassurance
b. Written contract
7) Keep key employee from leaving and taking relationships elsewhere
a. Non-compete
b. Non-disclosure
c. Tie leaving to financial loss
8) Key person insurance on key employee

## KEY EMPLOYEE

## JOHN THOMASON

Goal: Retain key employee in case of death or disability of owner.

## Ideas

1) Deferred bonus based on key employee staying with the company after death or disability of owner
2) Employee contract
3) Non-compete/non-disclosure
4) Key person insurance on John's life. Could be integrated with insurance purchased for inheritance
5) Identify/hire employee capable of taking over John's role as manager

## INHERITANCE PLANNING OPPORTUNITIES

## LIFETIME SPENDING AND LIQUIDITY

## YOUR LIQUID ASSETS - PROPOSED PLAN

## JOHN THOMASON

This illustrates your readily available liquid assets over the next 20 years. Promissory notes are not considered liquid assets until repaid. We are showing assets as liquid during the first 8 years of the plan, although some of these assets may currently be pledged as collateral.

## PERSONAL SPENDING VS. INCOME - PROPOSED PLAN

## JOHN THOMASON

This chart compares your personal cash flow income to cash flow expense under the proposed plan year by year for 20 years.

## INCREASE INHERITANCE AND REDUCE ESTATE TAX

## ASSETS PASSING TO YOUR FAMILY - CURRENT VS. PROPOSED

JOHN THOMASON

This chart compares the amount of your assets that will pass to heirs after estate taxes and costs of implementation in the current plan as against the proposed plan.

## CREATE AN IRREVOCABLE NON-GRANTOR TRUST

## JOHN THOMASON

## John creates an irrevocable non-grantor trust.

The Trust can be drafted to provide asset protection and long term estate tax savings through the use of dynasty trust provisions.

## GIFT TO NON-GRANTOR TRUST

## JOHN THOMASON

John makes a gift of $\$ 5,000,000$ of his non-voting interests in Business, LLC (assumed to be 50\%) to the Trust. This gift is designed to maximize available gifting exemption with an appreciating asset.

## Planning Goals Accomplished:

- Controls assets so inheritance provides opportunities while minimizing problems for children, grandchildren and future generations.
- Reduces estate taxes on appreciating assets
- Provides enhanced asset protection
- Heirs can have access to income generated from assets in the trust, while not being burdened with asset management decisions

## SELL BUSINESS, LLC INTERESTS TO TRUST

## JOHN THOMASON

John sells remaining non-voting interests in Business, LLC (assumed to be 50\%) to the Trust for an installment note.

## LOAN TO TRUST

## JOHN THOMASON

Investments, LLC loans $\$ 5,000,000$ of cash/securities to the Trust. These loan proceeds will help provide the necessary cash flow to continue reinvesting cash back into the trucking company.

## DYNASTY TRUST/FAMILY BANK TO HOLD INHERITANCES

## JOHN THOMASON

The Trust should be set-up as a Dynasty Trust. This trust would hold the inheritances for children and future generations in a asset protected and tax advantaged trust, while protecting heirs from having too much too soon.

The example on this page assumes annual distributions of $1 \%$ of the total Trust principal. This payout could be higher or lower. In addition, payments of principal could be made for health, education, maintenance, support or other items you feel would be appropriate to allow.

The Trust, acting as a family bank, may lend money to an heir to purchase a home or to start a business but will first assess the appropriateness of the transaction against a set of guidelines that have been drafted into the formation documents.

## PURCHASE LIFE INSURANCE IN THE TRUST

## JOHN THOMASON

Trustees of the Trust purchase 20 year term life insurance with the Trust assets. This assures an inheritance regardless of the short term performance of the business.

## Premium Payment Details

Premium in the amount of $\$ 40,000$ is paid with the earnings and capital of the Trust. The premium is scheduled to be paid for 20 years when the policy expires.

## INSURANCE PREMIUMS

We examined several premium payment options. The term insurance has the lowest cost in terms of net present value. However, insurance is not guaranteed to continue after year 20, as it would with the other policies shown.

| YEAR | PRINCIPAL ** | PRUDENTIAL | HANCOCK | PRINCIPAL | METLIFE |

Reflects the present value of premiums paid over 20 years with a discount rate of $5 \%$
All policies would lapse in year 21 without additional premiums paid.

## TRUST SPENDING VS. INCOME - PROPOSED PLAN

JOHN THOMASON

This chart compares cash flow income to cash flow expense inside of the Trust under the proposed plan year by year for 20 years. In years 2011-2017, expenses include annual cash reinvestments into the trucking company.

## CHARITABLE PLANNING OPPORTUNITIES

## TESTAMENTARY CHARITABLE LEAD ANNUITY TRUST (PART I)

## JOHN THOMASON

## Include language in your trust or will that creates a testamentary charitable lead trust (TCLAT) at your death.

# TESTAMENTARY CHARITABLE LEAD ANNUITY TRUST (PART II) 

## JOHN THOMASON

At the end of the TCLAT term, your heirs will receive all of the remaining trust assets.

Note: The amount passing to beneficiaries is entirely dependent on the rate of return of the assets in the trust. A higher rate of return means more passing to heirs and a lower rate of return could mean that nothing passes to heirs.

## ADDITIONAL TAX AND BUSINESS PLANNING

## INCOME TAX DEFERRED

## COMPARISON OF INCOME TAX RESULTS - PLAN YEAR 2011

## JOHN THOMASON

|  | Existing Plan | Proposed Plan | Captive Taxes Deferred | State Tax Saved |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2011 Estimated Income Tax | $\$$ | 839,000 | $\$$ | 457,000 | $\$$ | 350,000 | $\$$ |

This chart assumes death in 2030, and compares the results of the current plan with the proposed plan without a Captive Insurance Company.

Deferred Inheritance is a general approximation based on the long term performance of the TCLAT

## CREATE A CAPTIVE INSURANCE COMPANY

## JOHN THOMASON

You, or a trust, create and own a captive insurance company.
The captive is formed to insure currently insured and uninsured risks of Business, LLC - Trucking.

In the plan we have assumed that the Captive is owned by a trust.
This provides inheritance and estate tax benefits as well as income tax benefits.

## Planning Goals Accomplished:

- Asset protection
- Effective tool for passing a tax advantaged inheritance
- Creates income tax deferral for the company and increases current investment capital

## COMPANY INSURES RISKS

## JOHN THOMASON

The Captive Insurance Company insures various risks of loss.

Pay annual premiums of
$\$ 1,000,000$ to cover risk of loss.
BUSINESS, LLC - TRUCKING $\xrightarrow[\begin{array}{c}\text { Premiums for insurance are } \\ \text { deductible if they're ordinary } \\ \text { and necessary business expenses }\end{array}]{\longrightarrow}$

Premium is paid from the cash flow of the trucking company, which includes tax savings and loan proceeds as detailed later in the plan.

Net premium of up to $\$ 1.2 \mathrm{M}$ is excludable from captive company income if proper tax election is made

UNDERWRITING PROFITS

Underwriting profits of the captive will ultimately be distributed out to the owner of the captive

## DISCLAIMER AND DISCLOSURE

## JOHN THOMASON

InKnowVision, LLC does not give accounting or investment advice to its clients. The effectiveness of any of the strategies described will depend on your individual situation and on a number of complex factors.

You should consult with your other advisors on the accounting and investment implications of the proposed strategies before any strategy is implemented.

Any discussion in this presentation relating to tax, accounting, investments, regulatory, or legal matters is based on our understanding as of the date of this presentation. Rules in these areas are constantly changing and are open to varying interpretations.

Assumption Issues The plan involves numerous assumptions. While we believe that these assumptions are reasonable, it is important to understand that it is a virtual certainty that the actual results will differ from those illustrated. Returns on investment and performance of financial products such as insurance can cause the results to vary. Changes in tax, trust or property laws can cause plan results to vary. Plan implementation that differs from that described in the plan will cause the results to vary. Provision of state law may cause the plan results to vary.

Tax Opinions The IRS has recently issued new rules for tax practitioners regarding covered opinions, reliance opinions and marketed opinions. While this is an arcane area, suffice it to say that these opinions are often obtained by taxpayers for purposes of avoiding penalties. These opinions are obtained at substantial cost and after substantial legal analysis. If you believe that such an opinion would be helpful to you prior to entering into any of the transactions outlined in this plan, you should feel free do so.

Be advised that nothing in this analysis should be construed by you, your advisors or any one else as a covered opinion, reliance opinion, marketed opinion or any other type of opinion regarding any of the transactions or outcomes outlined in this plan.
