

CYBERSECURITY

[Crime-as-a-Service Targets Popular Platforms](#)

It's getting difficult to keep up with the jargon of all of the new digital scams. The SaaSes in the beginning became regular business terms, such as Software-as-a-Service (SaaS), and Business Processes-as-a-Service (BPaaS). But then the criminal enterprises came up with Malware-as-a-Service (MaaS), Ransomware-as-a-Service (RaaS) and now Crime-as-a-Service (CaaS). [Read more](#)

DATA PRIVACY

[NIST Releases Privacy Framework: A Tool for Improving Privacy Through Enterprise Risk Management](#)

The National Institute of Standards and Technology (NIST) released its first privacy framework tool (the Privacy Framework) on January 16, 2020. In the Executive Summary, NIST states that with the unprecedented flow of data of individuals through a complex digital ecosystem, individuals may not be able to understand the potential consequences for their privacy as they interact with system and services, while at the same time, organizations "may not realize the full extent of these consequences for individuals, for society or for their enterprises..." For more on the background of the draft Privacy Framework, see our [previous post](#). [Read more](#)

NEW + NOW

[Changing the Conversation About Sharing and Using Health Information](#)

Some app developers know more about our health than our doctors do. Take, for instance, FitBit, which is attached to our wrist and measuring in real time our temperature, our heart rate, our steps and whether we have had enough exercise for our age in a day. [Read more](#)

PRIVACY TIP #223

[Navigating Individual Data Privacy in a World with AI](#)

The same week that the National Institute of Standards and Technology came out with its Privacy Framework, highlighting how privacy is
