

An overview of EU, German federal and German states' financing measures for companies responding to COVID-19

1 April 2020

Introduction

In response to the economic effects of the COVID-19 pandemic and market uncertainty, plethora of financing measures was introduced at EU level, German federal level and German states levels. In their joint effect, these measures are aimed at shielding enterprises from the crisis, by offering different liquidity programs for overbridging temporary, crisis-evoked liquidity shortages.

Our note summarizes our understanding of the key EU, German federal and German states' financial and state aid measures. Developments in this area are fast-changing. Please note the date on which the note was last updated.

In many cases the legislation, guidance or other materials relating to these measures is limited in detail. This means that in some instances questions remain about the scope of some of these measures.
