## CPSC RECALL SNAPSHOT

A MONTHLY REVIEW OF CONSUMER PRODUCT RECALLS  
AND CIVIL PENALTIES ANNOUNCED BY THE CPSC

January 2018

Welcome to the January edition of the Alston & Bird *CPSC Recall Snapshot*.

While the government was shut down for part of January, the CPSC was hard at work in the last month, announcing 29 new product recalls in December 2017. In addition, the CPSC [approved](#) a new federal safety standard for children's folding chairs and stools. The standard incorporates ASTM F2613-17a, limiting the CPSC's standard to children's folding chairs and stools. The standard sets forth requirements for the chairs' and stools' latching and locking mechanisms, for their stability testing, and for their warning labels, among others. The effective date will be six months after the final rule is published in the *Federal Register*. The CPSC's announcement indicates that the rule comes after 153 reports, including 105 injuries, were made relating to children's folding chairs and stools from January 2003 to August 2017. The standard seeks to address the most frequent injuries, which include pinching, finger injuries, and instability issues.
