940	Customer Statement Message	Provides balance and transaction details of an account to a financial institution on behalf of the account owner

941	Balance Report	Provides balance information of an account to a financial institution on behalf of the account owner
942	Interim Transaction Report	Provides balance and transaction details of an account, for a specified period of time, to a financial institution on behalf of the account owner
950	Statement Message	Provides balance and transaction details of an account to the account owner
960	Request for Service Initiation Message	Initiates a Bilateral Key Exchange (BKE) process
961	Initiation Response Message	Acknowledges receipt of an MT 960
962	Key Service Message	Contains a bilateral authenticator key for another financial institution
963	Key Acknowledgement Message	Acknowledges receipt of the bilateral key sent in a previous MT 962
964	Error Message	Responds to an MT 960, 961, 963, 966 or 967 if an error has been detected to report that error
965	Error in Key Service Message	Responds to an MT 962 if an error has been detected and reports that error
966	Discontinue Service Message	Discontinues one or several bilateral authenticator keys already in existence between the Sender and Receiver
967	Discontinuation Acknowledgement Message	Acknowledges receipt of a previous MT 966 and confirms discontinuation of the authenticator key(s) specified in the MT 966
970	Netting Statement	Provides balance and transaction details of a netting position as recorded by a netting system
971	Netting Balance Report	Provides balance information for specified netting position(s)
972	Netting Interim Statement	Advises interim balance and transaction details of a netting position as recorded by a netting system
973	Netting Request Message	Requests an MT 971 or 972 containing the latest available information

985	Status Enquiry	Requests an MT 986
986	Status Report	Provides business related information about a customer or institution

Category n – Common Group Messages

MT	MT Name	Purpose
n90	Advice of Charges, Interest and Other Adjustments	Advises an account owner of charges, interest or other adjustments to its account
n91	Request for Payment of Charges, Interest and Other Expenses	Requests payment of charges, interest or other expenses
n92	Request for Cancellation	Requests the Receiver to consider cancellation of the message identified in the request
n95	Queries	Requests information relating to a previous message or amendment to a previous message
n96	Answers	Responds to an MT n95 Queries or MT n92 Request for Cancellation or other messages where no specific message type has been provided for the response
n98	Proprietary Message	Contains formats defined and agreed to between users and for those messages not yet live
n99	Free Format Message	Contains information for which no other message type has been defined

SWIFT Standards MX

The SWIFT Standards MX messages are listed according to the business area in which they have been defined.

Account Management

MX Identifier	MX Name	Purpose
acmt.001.001.02	AccountOpeningInstructionV02	The AccountOpeningInstructionV02 message instructs the opening of an account or the opening of an account and establishing an investment plan.
acmt.002.001.02	AccountDetailsConfirmationV02	The AccountDetailsConfirmationV02 message confirms the opening of an account, modification of an account or the provision of information requested in a previously sent GetAccountDetails message.
acmt.003.001.02	AccountModificationInstructionV02	The AccountModificationInstructionV02 message instructs the modification of an existing account.
acmt.004.001.02	GetAccountDetailsV02	The GetAccountDetailsV02 message requests some or all details of a specific account.
acmt.005.001.02	RequestForAccountManagementStatusReportV02	The RequestForAccountManagementStatusReportV02 message requests the status of an AccountOpeningInstruction or an AccountModificationInstruction message.
acmt.006.001.02	AccountManagementStatusReportV02	The AccountManagementStatusReportV02 message provides the processing status of a previously received AccountOpeningInstruction or of an AccountModificationInstruction message.

Administration

MX Identifier	MX Name	Purpose

admi.001.001.01	ReportV01	The ReportV01 message is used for general application level data reporting. A message may contain either a full report or one single tranche (part) of a report split in multi-tranches (multi-parts). The message contains a mechanism to support the correct reassembling of the reporting data by an application.
admi.002.001.01	MessageRejectV01	The MessageRejectV01 message is sent by a central system to notify the rejection of a previously received message. It provides specific information about the rejection reason.
admi.004.001.01	SystemEventNotificationV01	The SystemEventNotificationV01 message is sent by a central system to notify the occurrence of an event in a central system.

Cash Management

MX Identifier	MX Name	Purpose
camt.003.001.03	GetAccountV03	The GetAccountV03 message is sent by a member to the transaction administrator. It requests information on the details of one or more accounts held at the transaction administrator, including information on the balances.
camt.004.001.03	ReturnAccountV03	The ReturnAccountV03 message is sent by a member to the transaction administrator. It provides information on the details of one or more accounts held at the transaction administrator, including information on the balances. The ReturnAccount message can be sent as a response to a related GetAccount message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.005.001.03	GetTransactionV03	The GetTransactionV03 message is sent by a member to the transaction administrator. It requests information about payment instructions held at the transaction administrator.

		Payment instructions are either sent by the member, debiting or crediting its account at the transaction administrator or received by the transaction administrator, crediting or debiting the member's account.
camt.006.001.02	ReturnTransactionV03	The ReturnTransactionV03 message is sent by the transaction administrator to a member of the system. It provides information on transactions and booked entries held at the transaction administrator. The ReturnTransactionV03 message can be sent as a response to a related GetTransaction message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.007.001.02	ModifyTransactionV03	The ModifyTransactionV03 message is sent by a member to the transaction administrator. It requests one modification in one payment instruction held at the transaction administrator and sent by the member, debiting or crediting its account at the transaction administrator.
camt.007.002.02	RequestToModifyPaymentV02	The RequestToModifyPaymentV02 message is sent by a case creator/case assigner to a case assignee. It requests the modification of characteristics of an original payment instruction.
camt.008.001.03	CancelTransactionV03	The CancelTransactionV03 message is sent by a member to the transaction administrator. It requests the cancellation of one payment instruction held at the transaction administrator and sent by the member.
camt.008.002.02	RequestToCancelPayment02	The RequestToCancelPaymentV02 message is sent by a case creator/case assigner to a case assignee. It requests the cancellation of an original payment instruction.
camt.009.001.03	GetLimitV03	The GetLimitV03 message is sent by a member to the transaction administrator. It requests information on the details of one or more limits set by the member (or on behalf of the member) and managed by the transaction administrator.

camt.010.001.03	ReturnLimitV03	The ReturnLimitV03 message is sent by the transaction administrator to a member of the system. It provides information on the details of one or more limits set by the member (or on behalf of the member) and managed by the transaction administrator. The ReturnLimit message can be sent as a response to a related GetLimit message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.011.001.03	ModifyLimitV03	The ModifyLimitV03 message is sent by a member to the transaction administrator. It requests modifications in the details of one particular limit set by the member and managed by the transaction administrator. Each ModifyLimit message can alter only one type of limit (current or default).
camt.012.001.03	DeleteLimitV03	The DeleteLimitV03 message is sent by a member to the transaction administrator. It requests the deletion of one particular limit set by the member and managed by the transaction administrator. Each DeleteLimit message can only delete one type of current limit (risk or liquidity management limit).
camt.013.001.01	GetMemberV01	The GetMemberV01 message is sent by a member to the transaction administrator. It requests information on static data maintained by the transaction administrator and related to the participants in the system and their membership status vis-à-vis this system.
camt.014.001.01	ReturnMemberV01	The ReturnMemberV01 message is sent by the transaction administrator to a member of the system. It provides information on static data maintained by the transaction administrator and related to the participants in the system and their membership status vis-à-vis this system. The ReturnMember message can be sent as a response to a related GetMember message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as

a warning or alarm when a problem has occurred.

camt.015.001.01	ModifyMemberV01	The ModifyMemberV01 message is sent by a member to the transaction administrator. It requests modifications to the static data related to the profile of a member that the transaction administrator maintains.
camt.016.001.01	GetCurrencyExchangeRateV01	The GetCurrencyExchangeRateV01 message is sent by a member to the transaction administrator. It requests information on static data maintained by the transaction administrator and related to currency exchange details as maintained for the system operations by the transaction administrator.
camt.017.001.01	ReturnCurrencyExchangeRateV01	The ReturnCurrencyExchangeRateV01 message is sent by the transaction administrator to a member of the system. It provides information on static data and related to currency exchange details as maintained for system operations by the transaction administrator. The ReturnCurrencyExchangeRate message can be sent as a response to a related GetCurrencyExchangeRate message (pull mode) or initiated by the account servicer (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.018.001.01	GetBusinessDayInformationV01	The GetBusinessDayInformationV01 message is sent by a member to the transaction administrator. It requests information on different types of administrative data linked to the system.
camt.019.001.02	ReturnBusinessDayInformationV02	The ReturnBusinessDayInformationV02 message is sent by the transaction administrator to a member of the system. It provides information on different types of administrative data linked to the system. The ReturnBusinessDayInformation message can be sent as a response to a related GetBusinessDayInformation message (pull mode), or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has

occurred.

camt.020.001.01	GetGeneralBusinessInformationV01	The GetGeneralBusinessInformationV01 message is sent by a member to the transaction administrator. It requests information on a broadcast-type message previously sent by the transaction administrator to all or some of the members, giving information related to the processing business.
camt.021.001.01	ReturnGeneralBusinessInformationV01	The ReturnGeneralBusinessInformationV01 message is sent by the transaction administrator to a member of the system. It provides some or all of the members with information related to the processing of the system. The ReturnGeneralBusinessInformation message can be sent as a response to a related GetGeneralBusinessInformation message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.023.001.02	BackupPaymentV02	The BackupPaymentV02 message is sent by a member to the transaction administrator. It requests a liquidity transfer from the member to another participant in the system when the user is in recovery mode.
camt.024.001.02	ModifyStandingOrderV02	The ModifyStandingOrderV02 message is sent by a member to the transaction administrator. It requests a change in the features of a permanent order for the transfer of funds between two accounts belonging to the same member and being held at the transaction administrator.
camt.025.001.01	ReceiptV01	The ReceiptV02 message is sent by the transaction administrator to a member of the system. It acknowledges the receipt of a message previously sent. The Receipt message is an application receipt acknowledgement and conveys information about the processing of the original message.
camt.026.001.02	UnableToApplyV02	The UnableToApplyV02 message is sent by a case creator/case assigner to a case assignee. It initiates an investigation of a payment instruction that cannot be

executed or reconciled.

camt.027.001.02	ClaimNonReceiptV02	The ClaimNonReceiptV02 message is sent by a case creator/case assigner to a case assignee. It initiates an investigation for missing funds at the creditor (missing credit entry to its account) or at an agent along the processing chain (missing cover for a received payment instruction).
camt.028.001.02	AdditionalPaymentInformationV02	The AdditionalPaymentInformationV02 message is sent by an account servicing institution to an account owner. It provides additional or corrected information on a payment instruction or statement entry, in order to allow reconciliation.
camt.029.001.02	ResolutionOfInvestigationV02	The ResolutionOfInvestigationV02 message is sent by a case assignee to a case creator/case assigner. It informs of the resolution of a case, and optionally provides details about the corrective action undertaken by the case assignee.
camt.030.001.02	NotificationOfCaseAssignmentV02	The NotificationOfCaseAssignmenV02 message is sent by a case assignee to a case creator/case assigner. It informs the case assigner of further action that is undertaken by the case assignee to process the case, eg, the assignment of the case to a next case assignee.
camt.031.001.02	RejectCaseAssignmentV02	The RejectCaseAssignmentV02 message is sent by a case assignee to a case creator/case assigner. It is used to reject a case.
camt.032.001.01	CancelCaseAssignment	The CancelCaseAssignment message is sent by a case creator/case assigner to a case assignee. It requests the cancellation of a case.
camt.033.001.02	RequestForDuplicateInstructionV02	The RequestForDuplicateInstructionV02 message is sent by the case assignee to the case creator/case assigner. It requests a copy of the original payment instruction considered in the case.
camt.034.001.02	DuplicateInstructionV02	The DuplicateInstructionV02 message is used by financial institutions, with their own offices, and/or with other financial institutions with which they have established bilateral

		agreements. It allows the exchange of duplicate payment instructions.
camt.035.001.01	ProprietaryFormatInvestigation	The ProprietaryFormatInvestigation message is used by financial institutions, with their own offices, and/or with other financial institutions with which they have established bilateral agreements. It is used as an envelope for a non standard message. It provides means to manage an exception or investigation which falls outside the scope or capability of any other formatted message. It also allows financial institutions to use message types which are awaiting live implementation in the Exceptions & Investigations solution
camt.036.001.01	DebitAuthorisationResponse	The DebitAuthorisationResponse message is sent by an account owner to its account servicing institution. It is used to approve or reject a debit authorisation request.
camt.037.001.02	DebitAuthorisationRequestV02	The DebitAuthorisationRequestV02 message is sent by an account servicing institution to an account owner. It requests authorisation to debit an account.
camt.038.001.01	CaseStatusReportRequest	The CaseStatusReportRequest message is sent by a case creator/case assigner to a case assignee. It requests the status of a case.
camt.039.001.02	CaseStatusReportV02	The CaseStatusReportV02 message is sent by a case assignee to a case creator/case assigner. It reports on the status of a case.
camt.040.001.03	FundEstimatedCashForecastReportV03	The FundEstimatedCashForecastReportV03 message reports the estimated cash incomings and outgoings of one or more investment funds on one or more trade dates.
camt.041.001.03	FundConfirmedCashForecastReportV03	The FundConfirmedCashForecastReportV03 message confirms the cash incomings and outgoings of one or more investment funds on one or more trade dates.
camt.042.001.03	FundDetailedEstimatedCashForecastReportV03	The FundDetailedEstimatedCashForecastReportV03 message reports the estimated cash incomings and

		outgoings, sorted by criteria defined by the user of one or more investment funds on one or more trade dates.
camt.043.001.03	FundDetailedConfirmedCashForecastReportV03	The FundDetailedConfirmedCashForecastReportV03 message reports the cash incomings and outgoings, sorted by criteria defined by the user of one or more investment funds on one or more trade dates.
camt.044.001.02	FundConfirmedCashForecastReportCancellationV02	The FundConfirmedCashForecastReportCancellationV02 message cancels a previously sent FundConfirmedCashForecastReport message.
camt.045.001.02	FundDetailedConfirmedCashForecastReportCancellationV02	The FundDetailedConfirmedCashForecastReportCancellationV02 message cancels a previously sent FundDetailedConfirmedCashForecastReport message.
camt.046.001.01	GetReservationV01	The GetReservationV01 message is sent by a member to the transaction administrator. It requests information on the details of one or more reservation facilities set by the member and managed by the transaction administrator.
camt.047.001.01	ReturnReservationV01	The ReturnReservationV01 message is sent by a member to the transaction administrator. It provides information on the details of one or more reservation facilities set by the member and managed by the transaction administrator. The ReturnReservation message can be sent as a response to a related GetReservation message (pull mode) or initiated by the transaction administrator (push mode). The push of information can take place either at prearranged times or as a warning or alarm when a problem has occurred.
camt.048.001.01	ModifyReservationV01	The ModifyReservationV01 message is sent by a member to the transaction administrator. It requests a modification of details of one or more reservation facilities set by the member and managed by the transaction administrator.
camt.049.001.01	DeleteReservationV01	The DeleteReservationV01 message is sent by a member to the transaction administrator. It requests a deletion of one or more reservation facilities set by the member and managed by the transaction administrator.

camt.050.001.01	LiquidityCreditTransferV01	The LiquidityCreditTransferV01 message is sent by a member to the transaction administrator. It requests a transfer of funds between two accounts belonging to the same member or the same group of accounts, and being held at the transaction administrator.
camt.051.001.01	LiquidityDebitTransferV01	The LiquidityDebitTransferV01 message is sent by a member to the transaction administrator. It requests a transfer of funds between two accounts belonging to the same member or the same group of accounts, and being held at the transaction administrator.
camt.052.001.01	BankToCustomerAccountReportV01	The Bank-to-CustomerAccountReportV01 message is sent by the account servicer to an account owner or to a party authorised by the account owner to receive the message. It can be used to inform the account owner, or authorised party, of the entries reported to the account, and/or to provide the owner with balance information on the account at a given point in time.
camt.053.001.01	BankToCustomerStatementV01	The Bank-to-CustomerStatementmessagV01e is sent by the account servicer to an account owner or to a party authorised by the account owner to receive the message. It is used to inform the account owner, or authorised party, of the entries booked to the account, and to provide the owner with balance information on the account at a given point in time.
camt.054.001.01	BankToCustomerDebitCreditNotificationV01	The Bank-to-CustomerDebitCreditNotificationV01 message is sent by the account servicer to an account owner or to a party authorised by the account owner to receive the message. It can be used to inform the account owner, or authorised party, of single or multiple debit and/or credit entries reported to the account.

Derivatives

defp.001.001.01	ContractCreated	The ContractCreated notification message indicates that a

MX Identifier	MX Name	Purpose
trea.001.001.02	CreateNonDeliverableForwardOpeningV02	The CreateNonDeliverableForwardOpeningV02 message is sent by a participant to a central system or to a counterparty to notify the opening of a non deliverable trade.
trea.002.001.02	AmendNonDeliverableForwardOpening V02	The AmendNonDeliverableForwardOpeningV02 message is sent by a participant to a central system or to a counterparty to notify the amendment of the opening of a non deliverable trade previously confirmed by the sender.
trea.003.001.02	CancelNonDeliverableForwardOpening V02	The CancelNonDeliverableForwardOpeningV02 message is sent by a participant to a central system or to a counterparty to notify the cancellation of the opening of a non deliverable trade previously confirmed by the sender.
trea.004.001.02	CreateNonDeliverableForwardValuation V02	The CreateNonDeliverableForwardValuationV02 message is sent by a participant to a central system or to a counterparty to notify the valuation of a non deliverable trade.
trea.005.001.02	AmendNonDeliverableForwardValuation V02	The AmendNonDeliverableForwardValuationV02 message is sent by a participant to a central system or to

		a counterparty to notify the amendment of the valuation of a non deliverable trade previously confirmed by the sender.
trea.006.001.02	CancelNonDeliverableForwardValuation V02	The CancelNonDeliverableForwardValuationV02 message is sent by a participant to a central system or to a counterparty to notify the cancellation of the valuation of a non deliverable trade previously confirmed by the sender.
trea.007.001.02	NonDeliverableForwardNotification V02	The NonDeliverableForwardNotificationV02 message is sent by a central system to a participant to provide details of a non deliverable forward trade.
trea.008.001.02	StatusNotificationV02	The StatusNotificationV02 message is sent by a central system to a participant to notify the current status of a foreign exchange option trade in the system.
trea.009.001.02	CreateForeignExchangeOption V02	The CreateForeignExchangeOptionV02 message is sent by a participant to a central system or to a counterparty to confirm a foreign currency option contract. This message is only suitable for Simple (i.e. not Barrier) Vanilla (i.e. not Binary, Digital, Notouch) Foreign Exchange Options.
trea.010.001.02	AmendForeignExchangeOption V02	The AmendForeignExchangeOptionV02 message is sent by a participant to a central system or to a counterparty to notify the amendment of a foreign currency option contract. This message is only suitable for Simple (i.e. not Barrier) Vanilla (i.e. not Binary, Digital, Notouch) Foreign Exchange Options.
trea.011.001.02	CancelForeignExchangeOption V02	The CancelForeignExchangeOptionV02 message is sent by a participant to a central system or to a counterparty to notify the cancellation of a foreign currency option contract. This message is only suitable for Simple (i.e. not Barrier) Vanilla (i.e. not Binary, Digital, Notouch) Foreign Exchange Options.
trea.012.001.02	ForeignExchangeOptionNotification V02	The ForeignExchangeOptionNotificationV02 message is sent by a central system to a participant to notify the current status of a trade in the system.

trea.013.001.01	WithdrawalNotificationV01	The WithdrawalNotificationV01 message is sent by a central system to notify the withdrawal of a trade which was previously notified to the receiver

Trade Services Management

MX Identifier	MX Name	Purpose
tsmt.001.001.02	AcknowledgementV02	The AcknowledgementV02 message is sent by the matching application to the party from which it received a message. It acknowledges the receipt of a message by the matching application.
tsmt.002.001.02	ActivityReportV02	The ActivityReportV02 message is sent by the matching application to the requester of an activity report. It reports on all transactions for which an activity has taken place within a given time span.
tsmt.003.001.02	ActivityReportRequestV02	The ActivityReportRequestV02 message is sent by either party involved in a transaction to the matching application. It requests a report on all transactions for which an activity has taken place within a given time span.
tsmt.004.001.01	ActivityReportSetUpRequest	The ActivityReportSetUpRequest message is sent by either party involved in a transaction to the matching application. It requests the reset of the pre-determined time at which an activity report is generated.
tsmt.005.001.01	AmendmentAcceptance	The AmendmentAcceptance message is sent by the party requested to accept or reject an amendment to the matching application. It accepts an amendment request.
tsmt.006.001.02	AmendmentAcceptanceNotificationV02	The AmendmentAcceptanceNotificationV02 message is sent by the matching application to the requester of an amendment. It notifies the acceptance of an amendment request.

tsmt.007.001.01	AmendmentRejection	The AmendmentRejection message is sent by the party requested to accept or reject an amendment to the matching application. It rejects an amendment request.
tsmt.008.001.02	AmendmentRejectionNotificationV02	The AmendmentRejectionNotificationV02 message is sent by the matching application to the requester of an amendment. It notifies the rejection of an amendment request.
tsmt.009.001.02	BaselineAmendmentRequestV02	The BaselineAmendmentRequestV02message is sent by either party involved in a transaction to the matching application. It requests the amendment of an established baseline.
tsmt.010.001.02	BaselineMatchReportV02	The BaselineMatchReportV02 message is sent by the matching application to the parties involved in the establishment of a transaction. It informs about either the successful establishment of a transaction (baseline) or the mis-matches found between two baseline initiation messages (InitialBaselineSubmission message, BaselineReSubmission message).
tsmt.011.001.02	BaselineReportV02	The BaselineReportV02 message is sent by the matching application to the parties involved in an amendment request or to the parties involved in a data set match. It reports either a pre-calculation or final calculation of the dynamic part of an established baseline.
tsmt.012.001.02	BaselineReSubmissionV02	The BaselineReSubmissionV02 message is sent by either the counterparty or the initiator of a transaction (baseline) to the matching application. It is used by the counterparty to respond on the registration of a *push-through* transaction in the matching application or by the initiator or counterparty to re-send earlier mis-matched baseline information.
tsmt.013.001.02	DateSetMatchReportV02	The DataSetMatchReportV02 message is sent by the matching application to the parties involved in a data set match. It either informs about the successful match of

		data sets submitted with the instruction *match* or *pre-match* (DataSetSubmission message) and the related baseline, or it informs about mis-matches found between data sets submitted with the instruction *match* or *pre-match* (DataSetSubmission message) and the related baseline.
tsmt.014.001.02	DataSetSubmissionV02	The DataSetSubmissionV02 message is sent by either party involved in the transaction to the matching application. It triggers either a match or a pre-match of the information submitted with the message.
tsmt.015.001.02	DeltaReportV02	The DeltaReportV02 message is sent by the matching application to the parties involved in the request of a baseline amendment. It lists the differences between the established and the newly proposed baseline.
tsmt.016.001.02	ErrorReportV02	The ErrorReportV02 message is sent by the matching application to the party from which it received a message. It informs about the inability of the matching application to process a received message.
tsmt.017.001.02	ForwardDataSetSubmissionReportV02	The ForwardDataSetSubmissionReportV02 message is sent by the matching application to the counterparty of the submitter of data sets. It passes on information related to the purchasing agreement(s) covered by the transaction(s) referred to in the message.
tsmt.018.001.02	FullPushThroughReportV02	The FullPushThroughReportV02 message is sent by the matching application to either party involved in a transaction. It passes on information that the matching application has received from either party. The forwarded information can originate from an InitialBaselineSubmission or BaselineReSubmission or BaselineAmendmentRequest message.
tsmt.019.001.02	InitialBaselineSubmissionV02	The InitialBaselineSubmissionV02 message is sent by the initiator of a transaction to the matching application. It initiates a transaction.

tsmt.020.001.01	MisMatchAcceptance	The MisMatchAcceptance message is sent by the party requested to accept or reject data set mis-matches to the matching application. It accepts mis-matches between data sets and the related baseline.
tsmt.021.001.02	MisMatchAcceptanceNotificationV02	The MisMatchAcceptanceNotificationV02 message is sent by the matching application to the submitter of mis-matched data sets. It notifies the acceptance of mis-matched data sets.
tsmt.022.001.01	MisMatchRejection	The MisMatchRejection message is sent by the party requested to accept or reject data set mis-matches to the matching application. It rejects mis-matches between data sets and the related baseline.
tsmt.023.001.02	MisMatchRejectionNotificationV02	The MisMatchRejectionNotificationV02 message is sent by the matching application to the submitter of mis-matched data sets. It notifies the rejection of mis-matched data sets.
tsmt.024.001.02	ActionReminderV02	The ActionReminderV02 message is sent by the matching application to either party involved in a transaction that it is expecting to take an action. It reminds a party of an action that it is expected to take.
tsmt.025.001.02	StatusChangeNotificationV02	The StatusChangeNotificationV02 message is sent by the matching application to the parties involved in the change of the status of a transaction. It informs about the change of a status.
tsmt.026.001.01	StatusChangeRequest	The StatusChangeRequest message is sent by either party involved in a transaction to the matching application. It requests a change in the status of a transaction.
tsmt.027.001.01	StatusChangeRequestAcceptance	The StatusChangeRequestAcceptance message is sent by the party requested to accept or reject the request of a change in the status of a transaction to the matching application. It informs about the acceptance of a request

to change the status of a transaction.

tsmt.028.001.02	StatusChangeRequestNotificationV02	The StatusChangeRequestNotificationV02 message is sent by the matching application to the party requested to accept or reject the request of a change in the status of a transaction. It notifies the request of a change in the status of a transaction.
tsmt.029.001.01	StatusChangeRequestRejection	The StatusChangeRequestRejection message is sent by the party requested to accept or reject the request of a change in the status of a transaction to the matching application. It informs about the rejection of a request to change the status of a transaction.
tsmt.030.001.02	StatusChangeRequestRejectionNotificationV02	The StatusChangeRequestRejectionNotificationV02 message is sent by the matching application to the submitter of a request to change the status of a transaction. It informs about the rejection of a request to change the status of a transaction.
tsmt.031.001.02	StatusExtensionAcceptanceV02	The StatusExtensionAcceptanceV02 message is sent by the party requested to accept or reject a request to extend the status of a transaction to the matching application. It informs about the acceptance of a request to extend the status of a transaction.
tsmt.032.001.02	StatusExtensionNotificationV02	The StatusExtensionNotificationV02 message is sent by the matching application to the parties involved in a request to extend the status of a transaction. It informs about the acceptance of a request to extend the status of a transaction.
tsmt.033.001.02	StatusExtensionRejectionV02	The StatusExtensionRejectionV02 message is sent by the party requested to accept or reject a request to extend the status of a transaction to the matching application. It informs about the rejection of a request to extend the status of a transaction.
tsmt.034.001.02	StatusExtensionRejectionNotificationV02	The StatusExtensionRejectionNotificationV02 message is sent by the matching application to the submitter of a

		request to extend the status of a transaction. It informs about the rejection of a request to extend the status of a transaction.
tsmt.035.001.02	StatusExtensionRequestV02	The StatusExtensionRequestV02message is sent by either party involved in a transaction to the matching application. It requests the extension of the status of a transaction.
tsmt.036.001.02	StatusExtensionRequestNotificationV02	The StatusExtensionRequestNotificationV02 message is sent by the matching application to the party requested to accept or reject a request to extend the status of a transaction. It notifies the request to extend the status of a transaction.
tsmt.037.001.02	StatusReportV02	The StatusReportV02 message is sent by the matching application to the requester of a status report. It reports on the status of transactions registered in the matching application.
tsmt.038.001.02	StatusReportRequestV02	The StatusReportRequestV02 message is sent by either party involved in a transaction to the matching application. It reports on the status of transactions registered in the matching application.
tsmt.039.001.02	StoreDataSetRequestV02	The StoreDataSetRequestV02 message is sent by the party specified in the baseline as data set submitter to the matching application. It requests the storage of data set(s) by the matching application.
tsmt.040.001.02	TimeOutNotificationV02	The TimeOutNotificationV02 message is sent by the matching application to the parties involved in a transaction. It informs that a transaction will be closed within a given span of time if no action is taken by either party.
tsmt.041.001.02	TransactionReportV02	The TransactionReportV02 message is sent by the matching application to the requester of a transaction report. It reports on various details of transactions registered in the matching application.

| tsmt.042.001.02 | TransactionReportRequestV02 | The TransactionReportRequestV02 message is sent by either party involved in a transaction to the matching application. It reports on details of transactions registered in the matching application. |
