Opportunity Zones Update

OVERVIEW OF OZ RULES

- The OZ program was created by the Tax Cuts and Jobs Act, enacted in December 2017 to help direct economic resources to low-income communities, spurring economic growth and job creation.
- The Opportunity Zones program provides three main tax incentives to taxpayers who invest capital gains in a Qualified Opportunity Fund (QOF):
 - <u>Temporary Deferral</u>. The taxpayer may defer recognition of eligible capital gains invested into a QOF until the earlier of the date on which the OZ investment is disposed of, or December 31, 2026.
 - <u>Step-Up in Basis</u>.

2.913.100

16.273.100

1.051

16.04

- If a taxpayer holds an interest in a QOF for at least 5 years, then no more than 90% of the capital gains will be included in the taxpayer's federal taxable income.
- If a taxpayer holds an interest in a QOF for at least 7 years, then no more than 85% of the capital gains will be included in the taxpayer's federal taxable income.
- <u>Permanent Exclusion</u>. If a taxpayer holds an investment in a QOF for at least 10 years, all gains accrued after the investment in a QOF will not be subject to tax when the taxpayer disposes of the investment.

2,389 3,300

OVERVIEW OF OZ RULES (CONT'D)

- In order to be eligible, capital gains must have arisen from the sale or exchange of property with an unrelated party before December 31, 2026 and must be invested in the QOF within 180 days of recognizing the gain.
- A QOF is any investment vehicle organized for the purpose of investing in OZ property, and may be classified as a corporation or partnership (which can include LLCs).
- At least 90 percent of a QOF's assets, calculated on two semiannual testing dates, must consist of OZ property. OZ property consists of:
 - Stock in an OZ business
 - OZ partnership interest (capital or profits) in an OZ business (includes LLCs)
 - OZ business property

2.913.100

16,273,100

1.051

16.04

- Tangible property used in a trade or business of the QOF
- Acquired by purchase after 12/31/2017
- Original use in the OZ begins with the QOF
- Substantially improved property (improvements exceed adjusted basis)
- Substantially all the use is in an OZ
- Also includes leased property

OVERVIEW OF OZ RULES (CONT'D)

• OZ Business:

2,913,100

16,273,100

- Substantially all the tangible property owned or leased is OZ business property
- At least 50% of gross income derived from active trade/business
- Substantial amount of any intangible property is used in the active trade or business
- Limits on financial property (deter passive investment)
- No "sin" businesses

OZ PROGRAM TIMELINE EXAMPLE

NOTE: For this example, the Taxpayer's initial basis is \$0 in the QOF investment and that the Taxpayer's basis in its QOF interest is not adjusted for any reason other than as a result of the steps shown above. Please note that a Taxpayer's basis in its QOF interest may be increased or decreased for other reasons under generally applicable rules of U.S. federal income tax law.

K&L GATES

FUND STRUCTURING FOR SINGLE AND MULTIPLE INVESTMENT FUNDS

- Basic OZ Fund Structure
- Single asset, or multiple assets using mirrored structure
- Asset specific or blind pool

1.94

16.04

1.051

2,913,100

16,273,100

Benefits

- Provides for exit event flexibility
- Offering can be pursuant to a subscription program and allow for multiple projects under mirrored structures
- Tiered structure provides for better OZ qualification flexibility

Limitations

3 300

2,389

- K-1s at both OZ Fund and OZ Partnership levels
- If long offering period with multiple projects, managing capital calls and rebalancing could be challenging

K&L GATES

FUND STRUCTURING FOR SINGLE AND MULTIPLE INVESTMENT FUNDS (CONT'D)

Comingled OZ Fund Structure

16.04

16,273,100

Benefits

- Traditional fund structure
- Easier to manage offering/commitment process
- Less administrative burden
- Diversification

Limitations

Potential exit issues

FUND STRUCTURING FOR SINGLE AND MULTIPLE INVESTMENT FUNDS (CONT'D)

- Issue: Statute provides that exit can only result from the sale of an interest in a QOF.
 - Proposed regs allow a QOF to sell its assets.
 - Lower-tier QOZB can't sell its assets.
- Notwithstanding the proposed regs:
 - Concerns about reliance

2,913,100

16,273,100

1 0 5 1

16.04

- Differences in depreciation recapture
- Projects that become unqualified could taint the QOF/other projects, require a restructuring

2.389 3.300

K&L GATES

FUND STRUCTURING FOR SINGLE AND MULTIPLE INVESTMENT FUNDS (CONT'D)

- Single asset: Provides the most flexibility
- Notwithstanding the proposed regs:

2.913.100

16,273,100

1 0 5 1

16.04

- Can't rebalance/manage traditional capital structure
- Need to appropriately allocate capital
- Better for one or limited closings with small offering periods

2,389 3,300

 Crossing and calculating an aggregate preferred return problematic

OVERVIEW PEOPLE RELATED CONTENT

The Tax Cuts and Jobs Act includes a new program called Opportunity Zones (each, an "OZ") that offers significant tax incentives for investors to help to attract funding for projects and businesses in low-income areas.

Under the incentive, individuals and other entities can delay paying federal income tax on capital gains until as late as December 31, 2026 if those gains are invested in "Opportunity Funds" that invest at least 90% of their assets in businesses or tangible property located in low-income areas designated as OZs. Further, the gains on investments in the Opportunity Funds can be federal income tax-free if the investment is held or at least 10 years. The tax benefits could reduce the cost of capital for these projects, making them more viable, especially when paired with other development incentives like the New Markets Tax Credit. Congress intended that the OZ incentive operate with minimal restrictions in order to maximize investor participation and thus economic activity and job creation. The K&L Gates OZ Team provides a full spectrum of cross-practice services to help fund sponsors, developers, innovators, and investors understand and implement this new incentive in order to unlock its full investment potential.

ESG Reporting Standards

Assessing ESG Investments

A look at a hot-button issue in ESG investing: Investment standards for ESG Investing

ENVIRONMENT, SOCIAL, GOVERNANCE (ESG)

- The ESG concept has evolved in the past five years as both a refinement and an expansion of –
 - CSR: Corporate Social Responsibility
 - SRI: Socially Responsible Investing

2,913,100

16.273.100

1 0 5 1

16.04

- It has long been accepted by corporate leaders that corporations have a responsibility not to engage in practices that harm the environment or society, and many have instituted internal policies to that effect
- ESG expands this concept to the investment industry, responding to increasing demands from society in general

2,389 3.300

ESG (CONT'D)

2,913,100

16.273.100

1.051

16.04

- Shareholders now demanding that corporations adopt ESG-based principles in their governance policies
- Investors, including funds and fund managers, increasingly incorporating ESG criteria in their investment strategies
