

## CYBERSECURITY

### [Capital One Required to Produce Forensic Report in Class Action](#)

As a litigator, when responding to any security incident, thoughtful consideration is given to the possibility that the security incident may wind up in litigation, and therefore, certain decisions are made in anticipation of that litigation. Without getting into the details of the legal doctrines of attorney-client privileges, work product doctrine, and in anticipation of litigation, suffice it to say that these doctrines are long-established in order for certain information and documents to be privileged and non-discoverable in litigation if the facts and circumstances warrant protection under these doctrines. [Read more](#)

## NEW + NOW

### [Have Questions About CMMC? Don't We All](#)

I had the pleasure of participating as a panelist this week for companies primarily involved in the maritime industry, and one of the topics discussed was the Department of Defense's (DOD) Cybersecurity Maturity Model Certification Program (CMMC). The discussion generated questions that I thought merited sharing. Simply put, the DOD's CMMC Program was designed to provide cybersecurity guidelines and certification for government contractors to achieve in order to bid on Requests for Proposals for government contracts. The purpose is to make sure all contractors that have access to sensitive classified and non-classified information have a cybersecurity program in place to protect the data the contractor receives from DOD. ## AUTONOMOUS VEHICLES

### [Toyota's 'Woven City' for Developing Autonomy, Robotics and AI](#)

Toyota plans to build a prototype 'city' of the future called Woven City, which is meant to be a 'living laboratory' that will serve as a home to full-time residents who will test and develop various technologies, including autonomy, robotics and artificial intelligence in a real-world environment. The city will be powered by hydrogen fuel cells and will sit on a 175-acre site at the base of Mount Fuji in Japan. Toyota will issue an open invitation to other commercial and academic partners interested in collaborating as well as scientists and researchers from around the world to work on their own projects in this real-world incubator. ## DRONES

### [Balancing New Technology and Privacy When Using Drones in Land Use and Construction](#)

The mixture of sheltering-in-place, warm weather, and increasing drone usage creates a combustible situation – literally. [Drone shootings](#) are [on the rise](#) as property owners seek to combat perceived trespass, nuisance and invasions of privacy.

These were some of the legal issues discussed during a webinar presented by the American Bar Association’s Section on Real Property Trusts and Estates (ABA RPTE) at its [32nd Annual Conference](#) (held virtually for the first time) on May 15, 2020. The webinar focused on the legal landscape and issues to consider in counseling real estate and construction businesses on the commercial use of small unmanned aerial systems (sUAS). The panel included attorneys as well as an [engineer](#), who presented. [Read more](#)

## PRIVACY TIP #240

### [Update iPhone OS as Soon as Possible for Jailbreak Zero-Day Vulnerability](#)

We have previously discussed pushes received from mobile phone manufacturers to update operating systems. Although the pushes claim that new features are included, there are also patches included to plug known vulnerabilities. If you keep pushing “later,” and you don’t update as soon as possible, those vulnerabilities continue to subject you to risk until they are patched. This week’s privacy tip updates the topic.
