

# Department of Defense FY18 research funding for the Congressionally Directed Medical Research Program

11 April 2018

The Congressionally Directed Medical Research Program (CDMRP) within the U.S. Army Medical Research and Materiel Command is a partnership formed by Congress and the military. It manages billions of dollars in Congressional appropriations for peer-reviewed research that discovers, develops, and delivers healthcare solutions for Service Members, Veterans, and the American public.. Our legislative practice has worked with clients to secure this critical funding and can assist those interested in securing new funding opportunities.

With the passage of the FY18 Omnibus Appropriations Bill, new funding levels have been announced showing increased funding opportunities for grants within the certain disease research programs.
