Bay Area COVID-19 Regulations Tracker

STATEWIDE

As of August 31, 2020, California has created the Blueprint for a Safer Economy, with revised criteria for loosening and tightening restrictions on activities. This replaces the County Data Monitoring List. There are four tiers and every county is assigned to a tier based on the rate of new cases and positivity (percentage of positive tests). Counties must remain in a tier for at least three weeks, and must meet the next tier's criteria for two consecutive weeks before moving to a less restrictive tier. If metrics worsen for two consecutive weeks, the county will be assigned to a more restrictive tier. See the next page for a summary of the Blueprint.
